Prealgebra and Introductory Algebra: An Applied Approach Richard N. Aufmann 2010-03-05 As in previous editions, the focus in PREALGEBRA & INTRODUCTORY ALGEBRA, remains on the Aufmann Interactive Method (AIM). Students are encouraged to be active participants in the classroom and in their own studies as they work through the How To examples and the paired Examples and You Try It problems. The role of active participant is crucial to success. Presenting students with worked examples, and then providing them with the opportunity to immediately work similar problems, helps them build their confidence and eventually master the concepts. To this point, simplicity plays a key factor in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully-constructed hierarchy of objectives. This objective-based approach not only serves the needs of students, in terms of helping them to clearly organize their thoughts around the content, but instructors as well, as they work to design syllabi, lesson plans, and other administrative documents. The Second Edition features a new design, enhancing the Aufmann Interactive Method and the organization of the text around objectives, making the pages easier for both students and instructors to follow. Algebra for First Graders Greg Sherman 2013-10-01 If your child is struggling with math, then this book is for you; the short book, covers the topic and also contains 30 practice problems to work with. This subject comes from the book "First Grade Math (For Home School or Extra Practice)"; it more thoroughly covers more first grade topics to help your child get a better understanding of first grade math. If you purchased that book, or plan to purchase that book, do not purchase this, as the problems are the same. Certain elements of this eBook require you to fill in blanks; this is obviously not possible in an eReader environment; it is recommended that you use a blank sheet of paper as you work through this book with your child.

Algebra II Carolyn Wheater 2015-11-03 Perhaps no subject strikes so much fear in the hearts of high school and college students as Algebra I, except of course its older, meaner sibling, Algebra II! Just when students think they've got a handle on linear equations, BOOM! Algebra II shatters their confidence with exponential and logarithmic functions! Starting with reinforcing concepts from Algebra I and with lots of practice and tips along the way, Idiot's Guides: Algebra II eases the reader into second-year algebra to help them master their academic goals. With Common Core instruction in mind, readers get: * A natural transition from Algebra I, with a review of relevant concepts and operations. * An in-depth review and expansion of polynomials * Easy guidance on solving complex rational expressions and radical functions * Instructions on how to perform operations on polynomials and factoring * An exploration of exponential and logarithmic functions * Tips on solving matrices and determinants * Special sidebars pointing out the reasoning behind the techniques, which is an essential part of Common Core instruction -- Separate workbook section of extra Algebra practice problems-like getting two books in one!
