International Business Law Lucio Ghia 2016-03-16 Il testo di International Business Law di Lucio Ghia si snoda su tre distinte direttrici. La prima si occupa delle grandi organizzazioni sovranazionali - Nazioni Unite, Organizzazione Mondiale del Commercio, Fondo Monetario Internazionale, Banca Mondiale, ecc. - fornendone un sintetico profilo storico, funzionale e per quanto possibile prospettico, alla luce dei necessari adeguamenti conseguenti alle trasformazioni geopolitiche ed economiche verificatesi negli ultimi decenni. La seconda direttrice pone il lettore a contatto con gli strumenti d'indirizzo legislativo sovranazionale - ben noti all'autore, da oltre dieci anni delegato italiano all'UNCITRAL, la Commissione permanente per il diritto commerciale internazionale delle Nazioni Unite - nonché, sul terreno dei grandi temi del diritto commerciale internazionale, con le problematiche concrete relative all'incontro tra impresa privata e Stato e/o controparti istituzionali estere quali soggetti contrattuali, trattato con ricchezza di approfondimenti e con rimandi alle fonti di diritto internazionale ed europeo, applicate all'esperienza pratica. La terza parte è infine dedicata ai contratti internazionali, alle loro specificità, alle insidie più frequenti, alle clausole da evitare o da favorire, illustrate da alcuni apprezzati protagonisti della negoziazione e della contrattualistica internazionale, in una prospettiva non solo dottrinale e/o massimalistica ma davvero utile professionalmente, grazie al taglio autenticamente pratico, legato alla vita degli affari societari e commerciali.

International Business Law: Cases and Materials George D. Cameron III 2015-08-09 INTERNATIONAL BUSINESS LAW: CASES AND MATERIALS is a timely and useful book. Uncounted millions of "international" transactions occur daily, as goods and services are purchased across the national boundaries of some 200 political units. Capital flows from nation to nation, and so-to a lesser extent-do jobs, as companies seek more favorable locations for their business operations. The "rules" (laws) governing these exchanges quickly become complex, as persons (and governments) from different countries are involved. If problems arise in a cross-border relationship, whose rules apply? What forums are available to resolve disputes? Are there tax implications to the transaction? If so, where? These and similar questions need to be factored into the decision to "go overseas." Each of the six chapters in this book begins with a brief overview of the subject-matter, followed by short previews of the chosen case examples. The primary content of the chapters consists of some 120 court and arbitration decisions in real disputes, between real parties. The actual text of the decisions in these cases has been edited; some excerpts are quite brief, others are more substantial. Most "background" facts have been summarized by the author, but the edited-decision part of each case is quoted from the actual recorded text of the court or arbitrator who decided it. Clearly, a minute sample from tens of thousands of cases cannot provide comprehensive coverage of what all the world's legal rules are. Our objectives here are simply to indicate some of the major potential "flash points" of doing international business, to illustrate some of the significant differences in the applicable legal rules, and to provide an exposure to the language and process by which international business disputes are resolved. "Fore-warned is fore-armed." Being aware of these potential trouble spots, a sensible business manager will presumably consider them in making the decision to engage in cross-border transactions, and take appropriate steps to avoid or minimize potential adverse consequences. Chapter I of this book introduces International Law-its course of development and its two major sources (custom and treaties). Chapter II examines the use of national and international courts and arbitrators to resolve cross-border disputes. Chapter III provides basic coverage of the United Nations Convention on Contracts for the International Sale of Goods: when it applies, how the sale contract is formed, when risk of loss on the goods passes from Seller to Buyer, and what responsibilities the Seller has for the quality of the goods sold. Chapter IV looks at some of the legal questions that might arise in conducting cross-border commercial operations-employment issues, intellectual property issues, and investment issues. Chapter V considers potential questions regarding taxation of international activities, and the regulation of adverse environmental effects. Chapter VI reviews the efforts by national governments to apply their competition regulations to international business transactions, and the difficulties that private parties might have in attempting to enforce legal claims against governments and their agencies. While these are surely not the only legal issues that might arise in connection with international business, they do constitute a significant set of concerns of which managers need to be aware as they venture into the international "stream of commerce."

Business Law in Canada Richard Yates 1998-06-15 Appropriate for one-semester courses in Administrative Law at both college and university levels. Legal concepts and Canadian business applications are introduced in a concise, one-semester format. The text is structured so that five chapters on contracts form the nucleus of the course, and the balance provides stand-alone sections that the instructor may choose to cover in any order. We've made the design more reader-friendly, using a visually appealing four-colour format and enlivening the solid text with case snippets and extracts. The result is a book that maintains the strong legal content of previous editions while introducing more real-life examples of business law in practice.

Found in Alberta Robert Boschman 2014-10-22 Found in Alberta: Environmental Themes for the Anthropocene is a collection of essays about the natural environment in a province rich in natural resources and aggressive in development goals. This is a casebook on Alberta from which emerges a far wider set of implications for North America and for the biosphere in general. The writers come from an array of disciplinary backgrounds within the environmental humanities. The essays examine the oil/tar sands, climate change, provincial government policy, food production, industry practices, legal frameworks, wilderness spaces, hunting, Indigenous perspectives, and nuclear power. Contributions from an ecocritical perspective provide insight into environmentally themed poetry, photography, and biography. Since the actions of Alberta's industries and government are currently at the heart of a global environmental debate, this collection is valuable to those wishing to understand the natural and commercial forces in play. The editors present an introductory argument that frames these interests inside a call for a rethinking of our assumptions about the natural world and our place within it.
