(stephen.kemp@district196.org) Have a wonderful and relaxing summer! I am looking forward to delving into the study and exploration of a branch of mathematics which has been referred to ...

[BASIC REVIEW OF CALCULUS I - University of Washington](#)

A major application of limits in Calculus I comes from the definition of the derivative. In particular, we defined the derivative of a function $f(x)$ to be $f'(x) = \lim_{h \rightarrow 0} \frac{f(x+h) - f(x)}{h}$. A common problem for calculus students is remembering the properties of trigonometric and logarithmic functions. I review some of these key ideas here:
