*New Guide for Occupational Exploration* J. Michael Farr 2006 The New Guide for Occupational Exploration gives you a feel for specific careers and whether they match your interests. It begins by asking you to identify your interest level in 16 Interest Areas. You then examine Work Groups of jobs within the cluster to identify types of careers that interest you most. Finally, specific jobs are listed within those Work Groups. The process is simple, and after you narrow down your options, you are provided with loads of information for each Work Group to help you decide which jobs to explore in more detail. Book jacket.

**Guide to Information Sources in Engineering** Charles R. Lord 2000 The only source that focuses exclusively on engineering and technology, this important guide maps the dynamic and changing field of information sources published for engineers in recent years. Lord highlights basic perspectives, access tools, and English-language resources--directories, encyclopedias, yearbooks, dictionaries, databases, indexes, libraries, buyer's guides, Internet resources, and more. Substantial emphasis is placed on digital resources. The author also discusses how engineers and scientists use information, the culture and generation of scientific information, different types of engineering information, and the tools and resources you need to locate and access that material. Other sections describe regulations, standards and specifications, government resources, professional and trade associations, and education and career resources. Engineers, scientists, librarians, and other information professionals working with engineering and technology information will welcome this research
