**A Practical Introduction to Homeland Security and Emergency Management** Bruce Oliver Newsome 2015-09-24 A Practical Introduction to Homeland Security and Emergency Management: From Home to Abroad offers a comprehensive overview of the homeland security field, examining topics such as counter-terrorism, border and infrastructure security, and emergency management. Authors Bruce Newsome and Jack Jarmon take a holistic look at the issues and risks, their solutions, controls, and countermeasures, and their political and policy implications. They also demonstrate through cases and vignettes how various authorities, policymakers and practitioners seek to improve homeland security. The authors evaluate the current practices and policies of homeland security and emergency management and provide readers with the analytical framework and skills necessary to improve these practices and policies.

**Human Resource Management** Lawrence S. Kleiman 2000 The general management approach in this text emphasizes how the human resource function helps an organization gain competitive advantage. Rather than focusing on detailed theoretical coverage geared to the Human Resource Professional, this book focuses each chapter on developing a clear understanding of the various HR functions and on the working relationship between the HR department and other organizational departments. The information presented is targeted to the 90% of students who will not become HR professionals.

**City Power** Richard Schragger 2016-09-01 In 2013, Detroit filed the largest municipal bankruptcy in US history. That dubious honor marked the end of a long decline, during which city leaders slashed municipal costs and desperately sought to attract private investment. That same year, an economically resurgent New York City elected a progressive mayor intent on reducing income inequality and spurring more equitable economic development. Whether or not Mayor Bill de Blasio realizes his legislative vision, his agenda raises a fundamental question: can American cities govern, or are they powerless in the face of global capital? Conventional economic wisdom asserts that cities cannot do very much. Conventional political wisdom asserts that cities should not do very much. In City Power, Richard Schragger challenges both these claims, arguing that cities can govern, but only if we let them. In the past decade, city leaders across America have raised the minimum wage, expanded social services, put conditions on incoming development, and otherwise engaged in social welfare redistribution. These cities have not suffered from capital flight - in fact, many are experiencing an economic renaissance. Schragger argues that the range of city policies is not limited by the requirements of capital, but instead by a constitutional structure that serves the interests of state and federal officials. Maintaining weak cities is a political choice. City Power shows how cities can govern despite constitutional limitations - and why we should want them to. In an era of global capital, municipal power is more relevant than ever to citizen well-being. A dynamic vision of city politics for the new urban age, City Power demonstrates that the city should be at the very center of our economic, legal, and political thinking.

**EBOOK: Economics: A Southern African Context** J. van Rensburg 2021-04-22 Economics studies how people, businesses and governments use resources. What shapes our decisions? How do we allocate goods and services? What does a rational choice look like? In this third edition of Economics: A Southern African Context, the authors expertly guide us through the key principles of economics, providing a solid foundation in the subject. The text combines relevant Southern African examples with a clear and accessible narrative. By encouraging critical engagement with economic theories, it provides a basis for examining today's economic, social, and political issues. Key Features: • A new structure to refocus the book and align with teaching • Additional online chapters, including the Economics of Pandemics, available in Connect® • Fully updated pedagogy, including Interactive Graphs, Last Word, and Quick Quiz boxes • Discussions on new developments in economics, such as the consequences of COVID-19 and the impact of BRICS membership on trade in South Africa • Revised end-of-chapter content to test comprehension, including Review Questions, Discussion Questions and Problems, available in Connect® Economics: A Southern African Context is available with McGraw Hill's Connect®, the online learning platform which features resources to help faculty and institutions improve student outcomes and course delivery efficiency. Jan J. Janse van Rensburg is a lecturer at the University of Pretoria. His main area of interest is in teaching and course development with a focus on Principles of Economics. He also specializes in Health Economics, concentrating on the economic effects and costs of substance abuse. Campbell R. McConnell was a professor at the University of Nebraska-Lincoln, where he taught from 1953 until his retirement in 1990. Stanley L. Brue is a professor at Pacific Lutheran University, where he has been honoured as a recipient of the Burlington Northern Faculty Achievement Award. Sean M. Flynn is an associate professor of economics at Scripps College in Claremont, California.

**"Can We All Get Along?"** Paula D. McClain 2013-07-16 In a nation built by immigrants and bedeviled by the history and legacy of slavery and discrimination, how do we, as Americans, reconcile a commitment to equality and freedom with persistent inequality and discrimination? And what can we do about it? This widely acclaimed text by Paula D. McClain, with new coauthor Jessica D. Johnson Carew, provides a comprehensive and accessible overview of the historical and contemporary political experience of the major groups-African Americans, Latinos, Asian Americans, and American Indians-in the United States. It explores the similarities and differences in these groups' representation and participation in law, politics, and policymaking, discusses the enduring issues and concerns that they face, and examines intra- and inter-group competition and coalition-building in the face of enduring conflict and inequality. The seventh edition has been thoroughly revised and updated to include coverage of President Barack Obama's second term, the 2016 election, police brutality and Black Lives Matter, and the Dakota Access Pipeline protest movement. With a brand-new chapter on the intersections of race and gender, "Can We All Get Along?" remains unparalleled in its comparative coverage of the current landscape of minority politics in the United States.

**Econometric Analyses of International Housing Markets** Rita Yi Man Li 2016-03-31

This book explores how econometric modelling can be used to provide valuable insight into international housing markets. Initially describing the role of econometrics modelling in real estate market research and how it has developed in recent years, the book goes on to compare and contrast the impact of various macroeconomic factors on developed and developing housing markets. Explaining the similarities and differences in the impact of financial crises on housing markets around the world, the author's econometric analysis of housing markets across the world provides a broad and nuanced perspective on the impact of both international financial markets and local macro economy on housing markets. With discussion of countries such as China, Germany, UK, US and South Africa, the lessons learned will be of interest to scholars of Real Estate economics around the world.

**Digital-Supported Workflow of Orthopedic Surgeries** Benjamin Lahmann 2021-10-28 German hospitals are increasingly being asked to improve efficiency while striving to enhance the quality of standards that will afford a high level of patient safety and quality in the treatment process. The main objective of this Ph.D. thesis was to analyze whether digital support software used during surgery has a positive effect on selected clinical process and quality ratios in orthopedics. Two retrospective case-control studies of 383 hip joint endoprosthetic implantations and 297 knee joint endoprosthetic implantations were conducted at a German hospital between 2015 and 2020. Statistically significant results were evaluated commercially within the framework of the German diagnosis-related groups. Results show that the use of digitally assisted surgery leads to significantly shorter hospital stays and reduces postoperative complications, which in turn has a direct impact on treatment costs and hospital revenues.

**Philosophy of Sex and Love** Patricia Marino 2019-03-13 Writing for non-specialists and students as well as for fellow philosophers, this book explores some basic issues surrounding sex and love in today's world, among them consent, objectification, non-monogamy, racial stereotyping, and the need to reconcile contemporary expectations about gender equality with our beliefs about how love works. Author Patricia Marino argues that we cannot fully understand these issues by focusing only on individual desires and choices. Instead, we need to examine the social contexts within which choices are made and acquire their meanings. That perspective, she argues, is especially needed today, when the values of individualism, self-expression, and self-interest permeate our lives. Marino asks how we can fit these values, which govern so many areas of contemporary life, with the generosity, caring, and selflessness we expect in love and sex. Key Features of Philosophy of Sex and Love: An Opinionated Introduction Offers a contemporary, problems-based approach to the subject, helping readers better understand and address current issues and controversial questions Includes coverage of sex and love as they intersect with topics like disability, race, medicine, and economics Considers not only the ethical, but also the broadly social and political dimensions of sex and love Includes a helpful introduction and conclusion in each chapter and is written throughout in a clear and straightforward

style, with examples and signposts to help guide the student and general reader A comprehensive and up-to-date bibliography provides a valuable tool for anyone's further research

**Credible Asset Allocation, Optimal Transport Methods, and Related Topics** Songsak Sriboonchitta 2022-08-30 This book describes state-of-the-art economic ideas and how these ideas can be (and are) used to make economic decision (in particular, to optimally allocate assets) and to gauge the results of different economic decisions (in particular, by using optimal transport methods). Special emphasis is paid to machine learning techniques (including deep learning) and to different aspects of quantum econometrics—when quantum physics and quantum computing models are techniques are applied to study economic phenomena. Applications range from more traditional economic areas to more non-traditional topics such as economic aspects of tourism, cryptocurrencies, telecommunication infrastructure, and pandemic. This book helps student to learn new techniques, practitioners to become better knowledgeable of the state-of-the-art econometric techniques, and researchers to further develop these important research directions

**Learning Strategies and Constructionism in Modern Education Settings** Daniela, Linda 2018-06-08 Educational strategies have evolved over the years due to research breakthroughs and the application of technology. By using the latest learning innovations, curriculum and instructional design can be enhanced and strengthened. Also, as learners move away from traditional scholarly media and toward technology-based education, students gain an advantage in learning about their world and how to interact with modern society. Learning Strategies and Constructionism in Modern Education Settings is a critical scholarly resource that enhances the competencies of educational professionals by providing practical advice on providing an innovative educational process to promote the cognitive growth of individuals, regardless of special needs or obstacles. The book features coverage on a variety of topics including integration approaches of digital media in the teaching/learning process, the role of parents for developing digital literacy in their young children, and the effectiveness of using technology tools to teach mathematics. As a publication focused on education advancements through technology, the book serves as a useful resource for academicians, educators, school administrators, and individuals seeking current research on education technologies.

**Distortions to Agricultural Incentives in Europe's Transition Economies** Kym Anderson 2008-06-05 The vast majority of the world's poorest households depend on farming for their livelihood. During the 1960s and 1970s, most developing countries imposed pro-urban and anti-agricultural policies, while many high-income countries restricted agricultural imports and subsidized their farmers. Both sets of policies inhibited economic growth and poverty alleviation in developing countries. Although progress has been made over the past two decades to reduce those policy biases, many trade- and welfare-reducing price distortions remain between agriculture and other sectors as well as within the agricultural sector of both rich and poor countries. Comprehensive empirical studies of the disarray in world agricultural markets first appeared approximately 20 years ago. Since then the OECD has provided estimates each year of market distortions in high-income countries, but there has been no comparable estimates for the world's developing countries. This volume is the first in a series (other volumes cover Africa, Asia, and Latin America) that not only fill that void for recent years but extend the estimates in a consistent and comparable way back in time--and provide analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half-century. 'Distortions to Agricultural Incentives in Europe's Transition Economies' provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the economies of Eastern Europe and Central Asia that are transitioning away from central planning. The book includes country and subregional studies of the ten transition economies of Central and Eastern Europe that joined the European Union in 2004 or 2007, of seven other large member countries of the Commonwealth of Independent States, and of Turkey. Together these countries comprise over 90 percent of the Europe and Central Asia region's population and GDP. Sectoral, trade, and exchange rate policies in the region have changed greatly since the dissolution of the Soviet Union in 1991, but price distortions remain. The new empirical indicators in these country studies provide a strong evidence-based foundation for evaluating policy options in the years ahead.

**The Citizen Marketer** Joel Penney 2017-05-05 From hashtag activism to the flood of political memes on social media, the landscape of political communication is being transformed by the grassroots circulation of opinion on digital platforms and beyond. By exploring how everyday people assist in the promotion of political media messages to persuade their peers and shape the public mind, Joel Penney offers a new framework for understanding the phenomenon of viral political communication: the citizen marketer. Like the citizen consumer, the citizen marketer is guided by the logics of marketing practice, but, rather than being passive, actively circulates persuasive media to advance political interests. Such practices include using protest symbols in social media profile pictures, strategically tweeting links to news articles to raise awareness about select issues, sharing politically-charged internet memes and viral videos, and displaying mass-produced T-shirts, buttons, and bumper stickers that promote a favored electoral candidate or cause. Citizens view their participation in such activities not only in terms of how it may shape or influence outcomes, but as a statement of their own identity. As the book argues, these practices signal an important shift in how political participation is conceptualized and performed in advanced capitalist democratic societies, as they casually inject political ideas into the everyday spaces and places of popular culture. While marketing is considered a dirty word in certain critical circles -- particularly among segments of the left that have identified neoliberal market logics and consumer capitalist structures as a major focus of political struggle -- some of these very critics have determined that the most effective way to push back against the forces of neoliberal capitalism is to co-opt its own marketing and advertising techniques to spread counter-hegemonic ideas to the public. Accordingly, this book argues that the citizen marketer approach to political action is much broader than any one ideological constituency or bloc. Rather, it is a means of promoting a wide range of political ideas, including those that are broadly critical of elite uses of marketing in consumer capitalist societies. The book includes an extensive historical treatment of citizen-level political promotion in modern democratic societies, connecting contemporary digital practices to both the 19th century tradition of mass political spectacle as well as more informal, culturally-situated forms of political expression that emerge from postwar countercultures. By investigating the logics and motivations behind the citizen marketer approach, as well as how it has developed in response to key social, cultural, and technological changes, Penney charts the evolution of activism in an age of mediated politics, promotional culture, and viral circulation.

**Fundamentals of International Aviation** Suzanne K. Kearns 2021-03-21 International aviation is a massive and complex industry that is crucial to our global economy and way of life. Designed for the next generation of aviation professionals, Fundamentals of International Aviation, second edition, flips the traditional approach to aviation education. Instead of focusing on one career in one country, it introduces readers to the air transport sector on a global scale with a broad view of all the interconnected professional groups. This text provides a foundation of 'how aviation works' in preparation for any career in the field (including regulators, maintenance engineers, pilots, flight attendants, airline and airport managers, dispatchers, and air traffic controllers, among many others). Each chapter introduces a different cross-section of the industry, from air law to operations, security to environmental impacts. A variety of learning tools are built into each chapter, including 24 case studies that describe an aviation accident related to each topic. This second edition adds new learning features, geographic representation from Africa, a new chapter on economics, full-color illustrations, and updated and enhanced online resources. This accessible and engaging textbook provides a foundation of industry awareness that will support a range of aviation careers. It also offers current air transport professionals an enriched understanding of the practices and challenges that make up the rich fabric of international aviation.

**Dialectical Democracy through Christian Thought** D. Brockman 2016-04-29 Dialectical Democracy through Christian Thought offers an accessible yet theologically groundbreaking intervention into the battle over the role of government in the market. This book shows that the fight over policy involves a fundamental disagreement about who we are as human beings: independent individuals, or essentially social creatures.

**Affordability of College Textbooks: Textbook Prices Have Risen Significantly in the Last Four Years, but Some Strategies May Help to Control These Costs for Students Divided We Fall** Alice M. Rivlin 2022-10-04 Rivlin believes that Americans can save our hyper-partisan politicians from themselves. This book is a practical guide for Americans across the political spectrum who are agonizing over partisan warfare, incivility, and policy gridlock and looking for ways they can help to get our democratic policy process back on track before it is too late.

**Obama in Office** James A. Thurber 2015-12-03 Barack Obama entered office on a wave of popular expectation: will he exit at the hands of a Tea Party inspired populist tsunami or return for four more years? Obama in Office brings together well-established political scientists and journalists to offer the first detailed assessment of President Obama and his first two years in office. This book covers the range of policy tests which the administration has faced during this period, including the recession and its jobless recovery, health care reform, financial regulation, the BP oil leak in the Gulf of Mexico, and the ongoing war in Afghanistan. Looking beyond the midterms, Obama in Office considers the results of 2010, the impact of the Tea Party, and the prospects for 2012.

**Rural Wealth Creation** John L. Pender 2014-06-05 This book investigates the role of wealth in achieving sustainable rural economic development. The authors define wealth as all assets net of liabilities that can contribute to well-being, and they provide examples of many forms of capital – physical, financial, human, natural, social, and others. They propose a conceptual framework for rural wealth creation that considers how multiple forms of wealth provide opportunities for rural development, and how development strategies affect the dynamics of wealth. They also provide a new accounting framework for measuring wealth stocks and flows. These conceptual frameworks are employed in case study chapters on measuring rural wealth and on rural wealth creation strategies. Rural Wealth Creation makes numerous contributions to research on sustainable rural development. Important distinctions are drawn to help guide wealth measurement, such as the difference between the wealth located within a region and the wealth owned by residents of a region, and privately owned versus publicly owned wealth. Case study chapters illustrate these distinctions and demonstrate how different forms of wealth can be measured. Several key hypotheses are proposed about the process of rural wealth creation, and these are investigated by case study chapters assessing common rural development strategies, such as promoting rural energy industries and amenity-based development. Based on these case studies, a typology of rural wealth creation strategies is proposed and an approach to mapping the potential of such strategies in different contexts is demonstrated. This book will be relevant to students, researchers, and policy makers looking at rural community development, sustainable economic development, and wealth measurement.

**Current Practices for Assessing Economic Development Impacts from Transportation Investments** Glen Weisbrod 2000 This synthesis report will be of interest to DOT administrators, supervisors, and staff, as well as to the consultants working with them in assessing the economic development impacts of existing or proposed transportation investments. Metropolitan Planning Organization regional and local staffs might also find it informative. It is intended to help practicing planners

become aware of the range of methods and analysis techniques available, organized by the different categories of agency needs, to address different types of planning, policy, and research needs. This synthesis summarizes the current state of the practice by means of a survey of transportation planning agencies in the United States, Canada, and the United Kingdom. This report provides reviews of the analysis methods used in recent project and program evaluation reports of these agencies, in addition to a bibliography of economic literature and guides.

Social Insurance and Economic Security George E. Rejda 2015-07-17 This classic social insurance work has been updated to cover a decade of policy developments and the impact of the recent economic crisis. The book includes in-depth discussion of all major programs to reduce economic insecurity in the United States, including Social Security, Medicare, workers' compensation, unemployment compensation, and temporary disability insurance. The principles, characteristics, and policy issues associated with social insurance and public assistance programs are discussed in detail. The book examines each major cause of economic insecurity and analyzes the appropriate social insurance program for dealing with the problem.
