Elementary (All-New Tales of the Elemental Masters) Mercedes Lackey 2013-12-03 In March 1987, Mercedes Lackey, a young author from Oklahoma, published her first novel, *Arrows of the Queen*. No one could have envisioned that this modest book would be the beginning of a fantasy career that would span decades and more than a hundred novels, with no signs of slowing yet. And among Ms. Lackey's many novels, few are as critically-acclaimed and beloved as those of the *Elemental Masters*. The novels in this series are loosely based on classic fairy tales, and take place in a fantasy version of turn-of-the-century London, where magic is real and *Elemental Masters* control the powers of Fire, Water, Air and Earth. Now the voices of other authors join Mercedes Lackey to add their own special touches to this delightful alternate history, in a world where magic is always just around the corner...

They are *Mindspeakers*, *FarSeers*, *Empaths*, *ForeSeers*, *Firestarters*, *FarSpeakers*, and more. These inborn talents—combined with training as emissaries, spies, judges, diplomats, scouts, counselors, warriors, and more—make them indispensable to their monarch and realm. Sought and Chosen by mysterious horse-like Companions, they are bonded for life to these telepathic, enigmatic creatures. Join Janny Wurts, Elisabeth Waters, Michele Lang, Fiona Patton, and others in twenty-four original stories, including a brand-new novella by Mercedes Lackey, all set in Valdemar, where: A young woman without any of the *Heralds'* Gifts must see a Companion safely delivered to Haven.... A Herald must revisit the mysteries of his childhood to save his own young family and combat a threat at the very heart of Valdemar.... A Hawkbrother flees for his life, trailed by a mysterious bird that prophesizes a dire future.... A mage must choose whether to steal a priceless artifact and be branded a thief and traitor, or let his country fall to magic that could prove far more deadly....

The Shape of God Terry David Silvercloud 2007 An explanation about the nature of material reality and motion, how solids, liquids, and gases come to be, the nature of the Sun and planets, the importance and nature of shapes and dimensional values, human evolution, the nature of religions and God, problems upon Earth and possible solutions, the history of Islam, the history of Christianity, the history of the Bible, the history of the Knight's Templar, the history of the Freemasons, notes about wave-lengths and frequencies. I will prove to you that the Earth has never made a circle (nor an ellipse) around the Sun and never will. I will prove to you that something DOES go much faster than light and that it does, indeed, curve space. The stuff that goes faster than light is the "sub-atomic" stuff that presents to us the stuff we call matter. How about that? And that's just the beginning of surprises.

Nordic Romanticism Cian Duffy 2022-08-11 *Nordic Romanticism: Translation, Transmission, Transformation* is an edited collection exploring the varied and complex interactions between national romanticisms in Britain, Denmark, Germany, Norway and Sweden. The collection considers both the reception and influence of Nordic romanticism in Britain and Germany and also the reciprocal impact of British and German romanticism in the Nordic countries. Taken as a whole, the volume suggests that to fully understand the range of these individual national romanticisms we need to see them not as isolated phenomena but rather as participating, via translation and other modes of reception, in a transnational or regional romanticism configured around the idea of a shared cultural inheritance in 'the North'.

The SAGE Encyclopedia of African Cultural Heritage in North America Mwalimu J. Shujaa 2015-07-13 The *Encyclopedia of African Cultural Heritage in North America* provides an accessible ready reference on the retention and continuity of African culture within the United States. Our conceptual framework holds, first, that culture is a form of self-knowledge and knowledge about self in the world as transmitted from one person to another. Second, that African people continuously create

their own cultural history as they move through time and space. Third, that African descended people living outside of Africa are also contributors to and participate in the creation of African cultural history. Entries focus on illuminating Africanisms (cultural retentions traceable to an African origin) and cultural continuities (ongoing practices and processes through which African culture continues to be created and formed). Thus, the focus is more culturally specific and less concerned with the broader transatlantic demographic, political and geographic issues that are the focus of similar recent reference works. We also focus less on biographies of individuals and political and economic ties and more on processes and manifestations of African cultural heritage and continuity. FEATURES: A two-volume A-to-Z work, available in a choice of print or electronic formats 350 signed entries, each concluding with Cross-references and Further Readings 150 figures and photos Front matter consisting of an Introduction and a Reader's Guide organizing entries thematically to more easily guide users to related entries Signed articles concluding with cross-references

Evolution and Literary Theory Joseph Carroll 1995 Over the past two decades, poststructuralism in its myriad forms has come to dominate literary criticism to the exclusion of virtually any other point of view. Few scholars have escaped the coercive authority of its programmatic radicalism. In *Evolution and Literary Theory*, Joseph Carroll vigorously attacks the foundational principles of poststructuralism and offers in their stead a bold new theory that situates literary criticism within the matrix of evolutionary theory.

Life as Its Own Designer Anton Markoš 2009-07-09 It has been nearly 150 years since Darwin published *On the Origin of Species*, and his theory of natural selection still ignites a forest of heated debate between scientific fundamentalists on the one hand and religious fundamentalists on the other. But both sides actually agree more than they disagree, and what has long been needed is a third way to view evolution, one that focuses more on the aspect of life and "being alive", one

that can guide us through, and perhaps out of, the fiery thicket. This book, a seminal work in the burgeoning field of Biosemiotics, provides that third way, by viewing living beings as genuine agents designing their communication pathways with, and in, the world. Already hailed as the best account of biological hermeneutics, *Life As Its Own Designer: Darwin's Origin and Western Thought* is a wholly unique book divided into two parts. The first part is philosophical and explores the roots of rationality and the hermeneutics of the natural world with the overriding goal of discovering how narrative can help us to explain life. It analyzes why novelty is so hard to comprehend in the framework of Western thinking and confronts head-on the chasm between evolutionism and traditional rationalistic worldviews. The second part is scientific. It focuses on the life of living beings, treating them as co-creators of their world in the process of evolution. It draws on insights gleaned from the global activity of the Gaian biosphere, considers likeness as demonstrated on homology studies, and probes the problem of evo-devo science from the angle of life itself. This book is both timely and vital. Past attempts at a third way to view evolution have failed because they were written either by scientists who lacked a philosophical grounding or New Age thinkers who lacked biological credibility. Markoš and his coworkers form an original group of thinkers supremely capable in both fields, and they have fashioned a book that is ideal for researchers and scholars from both the humanities and sciences who are interested in the history and philosophy of biology, biosemiotics, and the evolution of life.

DEI LEGACY Rico Paganini 2021-10-15 After a passionate decade of spiritual research and numerous journeys to Earth's cultural and megalithic power spots, Rico Paganini can conclusively prove that all the sacred books, prophecies and the 4-cycle calendar agree in one aspect: The turning point that will change everything is upon us NOW. One man bears witness in this book, because he can no longer remain silent and may wait no longer. What he has to reveal is simply too significant for humankind: The great Plan of Creation and the Plan of Redemption that will lead aligned people towards the light. The message that he delivers must manage to reach people now. Because time is running out. Only a few years remain before the turning point to return to the divine spheres. There are perhaps just two decades remaining. The author did not choose this messenger role. Rather, he accepted that an experience he had destined him to spread the word about the Divine Legacy. He is driven neither by ambition nor a craving for recognition, but instead, love and a promise. To feel that is what makes his calling so authentic and touching. For him it is like the person who discovers that a medicinal herb can heal a terrible illness. And now nothing can and may prevent him from informing all those who have the illness before it is too late. He does not expect gratitude. He does not need personal recognition. Only one thing matters to him: that the ascension of souls is successful. And that is what DEI LEGACY is all about the most important healing of all. Just that! And that is everything. This book reveals a wondrous holistic view to all those who able to receive its message without preconceptions and with the strength of their hearts, as well as a wonderful perspective of this uncertain and fearful time at the beginning of the 3rd millennium.
