Gro ß e Lexika und W ö rterb ü cher Europas Ulrike Ha ß 2012-01-01 This historical survey of European encyclopedias and dictionaries brings together both encyclopaedias, such as the ' Britannica ' or the German ' Brockhaus, ' i.e. factual reference works, and dictionaries, such as ' Webster ' s ' or the German ' Duden, ' i.e. linguistic reference works, as outside specialist circles little distinction is made between information about ' things ' and information about words and their meanings. From the Vocabolario della Accademia de la Crusca from 1612, via the great French Encyclop é die up to present-day works such as Wahrig, Duden and Wikipedia, the field of relevant works becomes increasingly tightly-knit. The individual reference works are described in historical portraits, and their particular lexicographical methodologies analysed.

New Perspectives on Safavid Iran Colin P. Mitchell 2011-03-03 Dedicated to the renowned Safavid historian Roger Savory, this book brings together a collection of studies on the Safavid state of Iran (1501-1722) from the perspectives of political, social, literary, and artistic history. Savory, a doyen of Safavid studies in the 1960s and 1970s, was responsible for expanding and popularizing the study of Iran in the 16th and 17th century. To celebrate this legacy, well-established scholars of medieval and early modern Iran have contributed specific studies reflecting an array of research interests and specializations, which include critical re-examinations of issues of gender, literature, art and architecture, cultural and linguistic currents, illustrated historical chronicles, and courtly and administrative practices under the Safavid dynasty. This unique compilation is indicative of a growing interest in Iran and Iranian studies in both the academic and public spheres, and as such contains a number of new perspectives which will serve to supplement and re-interpret the existing corpus of

Safavid scholarly literature to date. It will be an important text for scholars of world history and Middle East studies, as well as to historians in general.

The Legacy of Wilfred Cantwell Smith Ellen Bradshaw Aitken (1961 – 2014) 2017-03-15 First work to address the legacy of Wilfred Cantwell Smith and his influence on the development of religious studies and Islamic studies in the twentieth century. This is the first work to address the legacy of Wilfred Cantwell Smith (1916 – 2000), whose intellectual and institutional contributions helped shape the field of religious studies in the latter half of the twentieth century. As a young scholar, Smith taught Indian and Islamic history in Lahore for several years and witnessed the partition of India. Upon his return to North America, he obtained his PhD at Princeton University before embarking upon a long and distinguished career. He founded the Institute of Islamic Studies at McGill University and served as director of the Center for the Study of World Religions at Harvard University. Smith emphasized the place of the scholarly study of Islam in the Western academy long before Islam occupied its current position at the center of global politics, challenged the notion of monolithic world religions, and argued for the importance of dialogical processes and a personalist approach to the study of religion. Contributors to this volume, many of whom were Smith 's students, provide a wide-ranging exploration of his influence and legacy

Conscientious Objector Wayne R. Ferren Jr. 2021-03-16 What would you do if you were drafted to fight in a war? As a conscientious objector opposed to all wars, Wayne R. Ferren Jr. had to answer that question during the Vietnam War. He called on his religious and scientific backgrounds as well as his environmental activism to argue that he should be excluded from fighting in, or supporting this war. Following a successful defense of his claim, Wayne served two years of alternative civilian service, which influenced his professional and personal life for the next fifty years. Decades after his service, he was shocked to find his name on the Vietnam War Memorial, which turned out to be that of another young man with a similar name born the same year Wayne was born. That man died in 1968 when his plane was hit by artillery fire and crash landed at Khe Sanh Marine Combat Base. He will forever remain a teenage father killed in a senseless war. To this day, the duality haunts the author, and in this multifaceted memoir, he looks back at a lifetime and how his background, scientific training, and transcendentalism have guided him on a path of conscientious objection, service, and conservation, believing all things are sacred.

Virgins, Harlots and Sex David Chesney 2011-02-14 AN Earthy Look At Christianity. Many biblical terms have a consistent symbolic significance from Genesis to Revelation eg nudity, light and darkness, virgins, harlots. Nudity occurs in three of the most significant events in the whole Bible, and in every case it is best understood symbolically. This book demonstrates that symbolism is so powerful it can, for example, change the status of Isaiah's virgin birth prophecy from an absurdity to an astonishing fulfilment of prophecy. Harlots (described in the book as God's warning lights) also figure very prominently in the biblical coverage of both Jews and Christians. Another key theme is to show that the raw seed-concepts of the Hebrew Bible evolve so neatly into the Christian New Testament viewpoint over a 1000+ years that readers may conclude uninspired biblical script writers could not have organized it. Here are some quotes from the book that introduce intriguing and/or provocative new trains of thought: 1 "If you think linking sex with religious experience is a bit rich then you need to do some more Bible study." 2 "Indulgence in adultery is the most obvious of the sins proscribed in the Ten Commandments that could trace directly to hormonal influences." 3 "Should we be joining Haters Anonymous, Schadenfreude Anonymous or Egotists Anonymous . . . in order to qualify for a better land and to actually enjoy it." 4 "Some of our excretory functions are less than ideal for a brand new earth . . . the creator team could have done better by us . . . if they wanted to." 5 "It is tacitly assumed God did not conduct experiments in His creation efforts. No need to . . . He knows the end from the beginning! But . . ." Other challenging insights emerge in connection with Lot's use of his daughters as sex-sops, the possible symbolic significance of the Mosaic decree to cut off a lady's hand if she squeezed testicles, the massaging of data in St Matthew's genealogies, a religious uncertainty principle, and the reason God doesn't do something to stop the frightful things happening in the world. This is not a book built on hype and emotion. It makes extensive use of scholarly sources but has a light-hearted journalistic approach and is easy to read. In exploring the spiritual import of sexual issues in nature and revelation it

offers fresh perspectives on the bitter creation-evolution debate, the gross and genocidal behavior of the chosen people, the currently unacceptable biblical restrictions on human sexual behavior, and the decidedly low-key role of women in organized religion. Innovative, succinct, engaging, thought-provoking, and sometimes shocking!

From Birth to Adolescence Rev. Winston T. Jones 2018-02-06 The process of taking care of a physical baby in the world today is by far a sacrificial, tedious, yet gratifying endeavor for any parent. To hear the first words of a baby and to watch them take their first steps is nothing short of pure ecstasy for any parent! The role we play as parents is important to help our children grow and mature into successful adults, by providing them with physical, emotional, and spiritual nourishment. Just as the physical baby needs nourishment, so does the Christian. Rev. Winston Jones explores and dissects many of the ways in which a natural baby would live, function, and survive in the world today and provides some powerful parallels for the new Christian in Christ. This book is a simplistic approach to explain the walk of the new Christian from birth to adolescence. His book is a welcome into the church and Christianity today and is inviting to all who wish to be born again through Christ.

Imperienvergleich Andreas Kappeler 2009 In der Imperialgeschichte ist in den letzten Jahren vermehrt die Frage des Imperienvergleichs aufgeworfen worden. Die Autorinnen und Autoren der Veröffentlichung greifen dieses Thema aus osteuropäischer Perspektive auf, indem sie verschiedene Seiten imperialer Herrschaft in den Blick nehmen: Legitimationsweisen in historischen Kategorien und Wissensformen, imperiale Strategien und Gegenstrategien, Biographien zwischen Imperien, die räumliche Dimension des Imperialen. Entstanden ist das Buch anlässlich des 65. Geburtstags von Andreas Kappeler, dessen Forschungen zu Russland als Vielvölkerreich in der Imperienforschung internationalen Massstabe gesetzt hat. Die Beiträger gehen auf das Werk des Wissenschaftlers ein, indem sie in Studien über Epochen vom 16. bis zum 21. Jahrhundert Perspektiven einer an der longue durée interessierten und interimperial ausgerichteten Imperienforschung aufzeigen. Ein besonderes Augenmerk wird auf die Geschichte von Nationalitäten, auf Nationsbildung und Nationalismus gerichtet. Nicht zuletzt soll das Buch zeigen, wie wichtig der Blick auf die osteuropäischen Vielvölkerreiche für die Erforschung von Imperien im globalen Kontext sein kann.

Nonhuman DNA Typing Heather Miller Coyle 2007-08-29 The association of a suspect with the victim or crime scene through DNA evidence is one of the most powerful statements of complicity in a crime imaginable. No category of evidence has ever had the complete capacity to convict or exonerate an accused so absolutely in the eyes of the public. With the discriminatory powers of DNA and the variety of DNA markers now in regular use, the one thing keeping a third of all cases unsolved is the lack of human DNA evidence. However, the identification of polymorphic genetic loci in cats, dogs, plants, insects, bacteria, and viruses can provide the critical link between suspect and scene in the absence of human DNA. Non-Human DNA Typing: Theory and Casework Applications provides an introduction to the basic science underlying the emerging field of non-human DNA typing. It examines the use of non-human DNA evidence not just in homicide cases, but also in drug trafficking, poaching of endangered species, livestock fraud, and missing persons, as well as the identification of primary and secondary crime scenes. The book demonstrates the recognition, collection, and preservation of biological evidence at a crime scene, techniques of DNA fingerprinting, and DNA profiling. Using a wide variety of examples, applications, and case studies, the author describes the STR analysis of canine and feline samples, insects, and fungi, and their role as evidence in forensic science. Chapters consider the development of testing methods for animal evidence, soil DNA typing, and the use of DNA typing in wildlife investigations. A useful appendix includes an overview of the history of forensic serology and DNA. Combining science, case examples, legal decisions, and references, Non-Human DNA Typing: Theory and Casework Applications presents the forensic and legal applications of non-human DNA evidence for scientists, law enforcement, and attorneys.
