Like Family Margaret K. Nelson 2020-04-17 For decades, social scientists have assumed that "fictive kinship" is a phenomenon associated only with marginal peoples and people of color in the United States. In this innovative book, Nelson reveals the frequency, texture and dynamics of relationships which are felt to be "like family" among the white middle-class. Drawing on extensive, in-depth interviews, Nelson describes the quandaries and contradictions, delight and anxiety, benefits and costs, choice and obligation in these relationships. She shows the ways these fictive kinships are similar to one another as well as the ways they vary—whether around age or generation, co-residence, or the possibility of becoming "real" families. Moreover she shows that different parties to the same relationship understand them in some similar – and some very different – ways. Theoretically rich and beautifully written, the book is accessible to the general public while breaking new ground for scholars in the field of family studies.

Advances in Interdisciplinary Language Policy François Grin 2022-01-15 This book stems from the joint effort of 25 research teams across Europe, representing a dozen disciplines from the social sciences and humanities, resulting in a radically novel perspective to the challenges of multilingualism in Europe. The various concepts and tools brought to bear on multilingualism are analytically combined in an integrative framework starting from a core insight: in its approach to multilingualism, Europe is pursuing two equally worthy, but non-converging goals, namely, the mobility of citizens across national boundaries (and hence across languages and cultures) and the preservation of Europe's diversity, which presupposes that each locale nurtures its linguistic and cultural uniqueness, and has the means to include newcomers in its specific linguistic and cultural environment. In this book, scholars from applied linguistics, economics, the education sciences, finance, geography, history, law, political science, philosophy, psychology, sociology and translation studies apply their specific approaches to this common challenge. Without compromising the state-of-the-art analysis proposed in each chapter, particular attention is devoted to ensuring the cross-disciplinary accessibility of concepts and methods, making this book the most deeply interdisciplinary volume on language policy and planning published to date.

Detecting Peripheral-based Attacks on the Host Memory Patrick Stewin 2014-12-27 This work addresses stealthy peripheral-based attacks on host computers and presents a new approach to detecting them. Peripherals can be regarded as separate systems that have a dedicated processor and dedicated runtime memory to handle their tasks. The book addresses the problem that peripherals generally communicate with the host via the host's main memory, storing cryptographic keys, passwords, opened files and other sensitive data in the process – an aspect attackers are quick to exploit. Here, stealthy malicious software based on isolated micro-controllers is implemented to conduct an attack analysis, the results of which provide the basis for developing a novel runtime detector. The detector reveals stealthy peripheral-based attacks on the host's main memory by exploiting certain hardware properties, while a permanent and resource-efficient measurement strategy ensures that the detector is also capable of detecting transient attacks, which can otherwise succeed when the applied strategy only measures intermittently. Attackers exploit this strategy by attacking the system in between two measurements and erasing all traces of the attack before the system is measured again.

Guidelines for reintroductions and other conservation translocations 2013 "As the world's biodiversity faces the incessant threats of habitat loss, invasive species and climate change, there is an increasing need to consider more direct conservation interventions. Humans have moved organisms between sites for their own purposes for millennia, and this has yielded benefits for human kind, but in some cases has led to disastrous impacts. In response to this complex aspect of conservation management, the IUCN Species Survival Commission (SSC) Reintroduction Specialist Group (RSG) and Invasive Species Specialist Group (ISSG) have revised and published the IUCN 'Guidelines for Reintroductions and Other Conservation

Translocations'"--Website.

Business and Human Rights in Southeast Asia Mahdev Mohan 2014-09-25 Business and human rights has emerged as a distinct field within the corporate governance movement. The endorsement by the United Nations Human Rights Council of a new set of Guiding Principles for Business and Human Rights in 2011 reinforces the State's duty to protect against human rights abuses by third parties, including business; the corporate responsibility to respect human rights; and greater access by victims to effective remedy, both judicial and non-judicial. This book draws on the UN Guiding Principles and recent national plans of action, to provide an overview of relevant developments within the ASEAN region. Bridging theory and practice, the editors have positioned this book at the intersection of human rights risk and its regulation. Chapter authors discuss the implications of key case-studies undertaken across the region and various sectors, with a particular focus on extractive industries, the environment, and infrastructure projects. Topics covered include: due diligence and the role of audits; businesses' responsibilities to women and children; and the mitigation of human rights risks in the region's emerging markets. The book sheds light on how stakeholders currently approach business and human rights, and explores how the role of ASEAN States, and that of the institution itself, may be strengthened. In doing so, the book identifies critical challenges and opportunities that lie ahead for the region in relation to business and human rights. This book will be of excellent use and interest to scholars, practitioners and students of human rights, business and company law, international law, and corporate governance.
