*Interorganizational Information Systems for the Efficient Utilization of Renewable Resources* Sebastian Zander 2017-07-17 Systems of production today face an increasing need to respond to diverse societal challenges. This development has resulted in the need for a transition from a fossil- and mineral resource-dependent paradigm towards a path that takes advantage of bio-based resources. In this context, wood is going to be an important feedstock and an essential enabler towards the transition from a fossil-based to a bio-based society. However, wood is not available infinitely. Hence, increasing the efficiency of the processing and utilization of wood is an imperative. In this context, interorganizational IT plays a decisive role. Therefore, this cumulative dissertation sets out to offer insights into the circumstances and causal mechanisms of IT usage behaviors in the wood industry. Encompassing rich empirical data, the thesis provides answers to research questions surrounding the fields of interorganizational IT adoption and interorganizational IT value. The insights provide implications for practitioners in the wood industry on how to promote the adoption of interorganizational IT and how to design structures and processes to effectively profit from investments in IT. In addition, the thesis also provides guidance for academics studying the phenomena of IT adoption and IT value with regard to sector-specific characteristics.

*Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies* Keengwe, Jared 2022-12-28 Digital content and learning technologies are now the norm at all levels of education. However, there is evidence to suggest that this digital shift is on a spectrum and the spectrum impacts learners in different ways. This means that some instructors who seek to integrate digital content may do so using traditional teaching methods while others use innovative practices to engage learners. Those who integrate innovative digital practices align their instructional practice with theories to facilitate student-centered pedagogies that support and improve the depth and scope of student learning. A primary characteristic of student-centered learning is facilitating collaborative learning using digital content and learning technologies to engage students as well as to enhance meaningful learning. The *Handbook of Research on Facilitating Collaborative Learning Through Digital Content and Learning Technologies* provides K-20 educators with alternative pedagogical and andragogical models that are innovative and incorporate digital content and learning technologies that promote constructive learning. Further, this book explores the relationship between constructivist learning, digital content, and learning technologies. A primary argument in this book is that constructivist teaching strategies such as collaborative learning coupled with digital content and purposeful learning technologies could benefit student learning in ways that are different from those practiced in traditional, non-digital learning environments. Covering topics such as instructional design, self-efficacy, and library engagement, this major reference work is an essential resource for pre-service teachers, teacher educators, faculty and administrators of K-20 education, librarians, researchers, and academicians.

**Strategic information systems management for environmental sustainability : enhancing firm competitiveness with Green IS** Löser, Fabian 2015-07-06

During the last three decades, information and communication technologies have fundamentally changed the way we work, live and communicate. The ubiquity of internet services, which become increasingly interactive and complex, together with enhanced connectivity, facilitated by innovative mobile devices, induces an ever-rising demand for computing, storage and data transmission capacities. Today, information systems (IS) constitute the backbone of the globalized economy and are indispensable for modern business and production processes. At the same time, environmental sustainability has evolved as the most pressing societal challenge of the 21st century, in particular due to the looming threats of climate change. By virtue of their global influence and reach, business companies significantly contribute to the creation of environmental problems, but owing to their organizational knowledge, capabilities and resources, they also have the capacity and ability to play a key role in shaping the path towards a more sustainable development. The companies leading the way have noticed that corporate sustainability is not necessarily a burden that negatively impacts their bottom line. If strategically managed, environmental product and process innovations can decrease operational costs, enhance corporate reputation, and differentiate from competitors. With regard to environmental sustainability, IS play a contradictory role: on the one hand, the manufacturing, operation and disposal of information technology (IT) infrastructure are responsible for serious environmental impacts: from the mining of conflict minerals to carbon dioxide emissions that equal those of the airline industry to enormous amounts of toxic e-waste. On the other hand, IS are perceived as key enablers of a "green" economy: environmental management systems and the reengineering of business processes can substantially reduce the environmental impacts of business organizations, while technological innovations provide opportunities to decrease the ecological footprint of end-user products and services. Many organizations have started to implement first environmental measures to decrease IT energy consumption and to reduce operational costs, mostly in an unstructured and uncoordinated manner though. Although Green IS practices feature a considerable potential to increase corporate environmentalism while creating promising business opportunities, the adoption of enterprise-wide cross-functional initiatives aimed at implementing Green IS has been rather slow. Economic uncertainties regarding the long-term effects of Green IS adoption and the lack of appropriate management frameworks have been identified as main inhibitors of an encompassing implementation of Green IS initiatives throughout the enterprise. In this context, this thesis addresses relevant research gaps, contributes to theory development in the evolving Green IS research discipline, develops practice-oriented management frameworks, and emphasizes the importance of following a strategic approach to leverage the competitive potential of Green IS. This cumulative thesis comprises an introduction that includes a literature review and a pre-study, four theory-based conceptual research articles, and two empirical studies, one of them building on qualitative, exploratory case study research whereas the other relies on quantitative data which has been analyzed with structural equation modeling. This thesis targets four specific research goals to advance theory-building in Green IS research and to promote the adoption of Green IS in practice. First, this thesis clarifies and defines the central terms and key concepts Green IT, Green IS, Green IS strategy, and Green IS practices drawing on a transdisciplinary research approach. Second, the most important challenges and inhibitors of Green IS adoption are identified and characterized. In particular, the lack of management frameworks, which encourage a holistic implementation that follows a strategic rationale, the complexity of strategic Green IS alignment, the multi-dimensional performance impacts of cross-functional initiatives and, above all, the uncertainty relating to the business case of Green IS practices, are identified as the most pressing challenges. Third, current actions of business firms to address these challenges are examined. Building on exploratory case study research, distinctive Green IS strategies are identified in managerial practice. Most notably, the empirical insights from quantitative survey research suggest a positive relationship between Green IS adoption and firm competitiveness, thus decreasing the economic uncertainty which inhibits the implementation of far-reaching environmental initiatives. Fourth, practice-oriented management frameworks are developed. The fine-grained Green IS strategy concept advises the formulation of strategies addressing the corporate, competitive, and functional management level. The proposed typology of four Green IS strategies illustrates distinct strategic options, from which executives can choose under consideration of their competitive targets and the firm-specific context. To allow for consistency of Green IS strategies, the presented alignment framework facilitates coherence with economic and environmental corporate goals. Furthermore, the actors, roles and responsibilities relevant to the alignment process are described. In addition, a management framework for the holistic adoption of Green IS, which specifies decisive management areas and distinguishes between three degrees of environmental impacts, is presented along with a comprehensive catalogue of Green IS implementation measures. As a consequence, this research offers both empirical insights and conceptual models to advance the adoption of Green IS initiatives, thus meeting the challenges of climate change and turning corporate sustainability into a business opportunity. Informationssysteme (IS) zeigen in Bezug auf ökologische Nachhaltigkeit gegensätzliche Eigenschaften. Einerseits verursachen die Herstellung, der Betrieb sowie die Entsorgung von Informationstechnologie (IT) - Infrastrukturen schwerwiegende negative Umweltauswirkungen: Vom Abbau von Konfliktmineralien über Kohlendioxidemissionen bis hin zu beträchtlichen Mengen giftigen Elektroschrotts. Andererseits werden IS als Schlüsseltechnologien für eine nachhaltige Wirtschaft gesehen. Umweltmanagementsysteme und die Umgestaltung von Geschäftsprozessen können den ökologischen Fußabdruck von Organisationen bedeutend verringern. Zudem eröffnen technologische Innovationen neuartige Möglichkeiten, die Umweltauswirkungen von Produkten und Dienstleistungen über den gesamten Lebenszyklus hinweg zu senken. Zahlreiche Organisationen haben damit begonnen, einzelne Green-IT-Maßnahmen zu implementieren um den Energieverbrauch und operative Kosten zu senken. Allerdings

verfolgen die meisten Unternehmen hierbei keinen strukturierten oder strategischen Ansatz. Obwohl Green-IS-Initiativen beachtliche Potentiale zur Verbesserung der ökologischen Nachhaltigkeit von Organisationen bieten und gleichzeitig vielversprechende wirtschaftliche Chancen eröffnen, schreitet die Umsetzung von bereichsübergreifenden Green-IS-Maßnahmen in Unternehmen nur langsam voran. Ökonomische Unsicherheiten in Bezug auf die Rentabilität derartiger Maßnahmen sowie der Mangel an adäquaten Management-Frameworks werden in diesem Zusammenhang als zentrale Hinderungsgründe für eine strategische und ganzheitliche Umsetzung von Green-IS-Initiativen identifiziert. Diese Dissertation adressiert diese Hinderungsgründe, schafft Schlüsselkonzepte für den neuen Green-IS-Forschungszeitweig, entwickelt praxisorientierte Management-Frameworks und hebt die Bedeutung eines strategischen Ansatzes bei der Implementierung von Green IS hervor. Diese Forschungsarbeit offeriert empirische Einblicke wie auch konzeptionelle Modelle um die Umsetzung ganzheitlicher Green-IS-Initiativen in Organisationen voranzutreiben. Unternehmen haben somit die Chance, den Herausforderungen des Klimawandels verantwortungsvoll zu begegnen und gleichzeitig durch eine nachhaltige Unternehmensführung Wettbewerbsvorteile zu generieren.

Swayne 2012-07-17 The 6th edition of this established text is streamlined to a more manageable format, with the Appendices moved to the web-site and a significant shortening of the main text. There is a greater focus on the global analysis of industry and competition; and analysis of the internal environment. This reflects waning interest among senior executives in the pursuit of short-term shareholder value. As ever students are provided with the guidance they need to strategic planning, analysis of the health services environment (internal and external) and lessons on implementation; with additional discussion on organizational capability, deeper treatment of sustainability and corporate social responsibility and more coverage of the sources of organizational inertia and competency traps. This edition is rich in new examples from real-world health care organizations. Chapters are brought to life by the 'Introductory Incidents', 'Learning Objectives', 'Perspectives', 'Strategy Capsules', useful chapter summaries; and questions for class discussion. All cases and examples have been updated or replaced. **Extremely Short Cases on Strategic Management** Ajit Prasad 2002-08 The subject of Strategy is extremely complex and perhaps can be taught only through the use of Cases. Unfortunately, most of the available cases in Strategic Management tend to be extremely long, which test more the patience rather than the intellectual rigour. This book thus fulfills the void in the literature by offering a bouquet of cases that are designed not only to test the operational understanding but the conceptual and intellectual discipline that the reader must inculcate to be a successful strategist. The book contains 24 cases, ranging from mammoth public sector organisations like SBI and SAIL to global corporations like Cray and Apple, as also the sublimely interesting episodes in the like of Phoolan Devi and Princess Diana. All the cases are extremely readable, and are designed to introduce the different aspects of Strategic Management to the reader. The book is a must read for students, strategists as well as practicing managers.

**Redefining Global Strategy, with a New Preface** Pankaj Ghemawat 2018-04-10 New Tools for Succeeding Globally Why do so many global strategies fail—despite companies' powerful brands and other border-crossing advantages? Because a one-size-fits-all strategy no longer stands a chance. When firms believe in the illusions of a "flat" world and the death of distance, they charge across borders as if the globe were one seamless marketplace. But cross-border differences are larger than we assume. Most economic activity—including trade, real and financial investment, tourism, and communication—happens locally, not internationally. In this "semiglobalized" approach, companies can cross borders more profitably by basing their strategies on the geopolitical differences that matter; they must identify the barriers their strategies will have to overcome, and they must build bridges to cross those barriers. Based on rigorous research, Pankaj Ghemawat shows how to create successful strategies and provides practical management tools so you can: Assess the cultural, administrative, geographic, and economic differences between regions at the industry level—and decide which ones require attention Track the implications of the specific border-crossing actions that will impact your company's ability to create value the most Generate superior performance through strategies that are optimized for the three A's: adaptation (adjusting to differences), aggregation (overcoming differences), and arbitrage (exploiting differences) Using in-depth examples, Ghemawat reveals how companies such as Cemex, Toyota, Procter & Gamble, Tata Consultancy Services, IBM, and GE Healthcare are adroitly managing cross-border differences. He also shares examples of other well-known companies that have failed at this challenge. Crucial for any business competing across borders, Redefining Global Strategy will help you make the most of our semiglobalized world.

**Encyclopedia of Case Study Research** Albert J. Mills 2009-10-21 Case study research has a long history within the natural sciences, social sciences, and humanities, dating back to the early 1920's. At first it was a useful way for researchers to make valid inferences from events outside the laboratory in ways consistent with the rigorous practices of investigation inside the lab. Over time, case study approaches garnered interest in multiple disciplines as scholars studied phenomena in context. Despite widespread use, case study research has received little attention among the literature on research strategies. The Encyclopedia of Case Study Research provides a compendium on the important methodological issues in conducting case study research and explores both the strengths and weaknesses of different paradigmatic approaches. These two volumes focus on the distinctive characteristics of case study research and its place within and alongside other research methodologies. Key Features Presents a definition of case study research that can be used in different fields of study Describes case study as a research strategy rather than as a single tool for decision making and inquiry Guides rather than dictates, readers' understanding and applications of case study research Includes a critical summary in each entry, which raises additional matters for reflection Makes case study relevant to researchers at various stages of their careers, across philosophic divides, and throughout diverse disciplines Key Themes Academic Disciplines Case Study Research Design Conceptual Issues Data Analysis Data Collection Methodological Approaches Theoretical Traditions Theory Development and Contributions From Case Study Research Types of Case Study Research *Strategic Management: Concepts and Cases: Competitiveness and Globalization* Michael A. **Digital Marketing. A Case Study of Adidas and Snapchat** Ricardo Escoda 2018-08-28 Seminar paper from the year 2018 in the subject Business economics - Offline Marketing and Online Marketing, grade: 1,3, International School of Management, Campus Munich, language: English, abstract: Since market power has moved from enterprises to consumers, and global competition has increased substantially, managers in almost all industries need to face enormous performance challenges. To avoid being replaced by rivals, they are forced to be more innovative in establishing and performing their competitive strategies. Long-term success will not be achieved solely through competitiveness but instead will depend on the ability to evolve new demand and create and gather new markets. Therefore, marketing is one of the most fundamental topics when concentrating on the customers' desires. Mainly it is about picking up the clients by delivering a unique feeling in form of a must-have product. Adidas is counted among one of the global players of sports and lifestyle brands, together with its biggest competitors Nike and Puma. With an annual revenue of EUR 21.218bn (in 2017), over 56,888 employees worldwide, and more than 900 million products produced per year, the German business is an omnipresent sports and lifestyle brand, which became more and more important over the last decades. According to Statista, it was voted one of the ten most reputable companies worldwide in 2018, being the only sports and lifestyle brand in this ranking. In addition, Forbes published an article, stating that Adidas reached the third place of the World's most valuable sports brands, following Nike and ESPN. Yet by comparing the global revenues of Adidas, Nike and Puma from 2006 to 2017 it can be seen, that the company founded in 1924 by Adi Dassler in a small village in Southern Germany called Herzogenaurach is lagging behind Nike's global revenues for many years. This is one of the core reasons driving the brand with the three stripes to establish new marketing strategies for diversifying and simultaneously increasing its customer portfolio. The sections below concern aspects referring to the research fields E-Marketing and E-Commerce, Online Marketing, Online Advertising and Social Media, and Mobile Marketing. A summary with the most fundamental information is provided at the end of each part.

**Media Management** Bernd W. Wirtz 2020-09-11 "Digitalization significantly changes the media. Bernd Wirtz provides a valuable guideline for this new world, combining theory, facts, and practice." Dr. Hubert Burda, German publisher and Managing Corporate Partner of Hubert Burda Media Holding KG "The media business is subject to substantial change while differences between distinctive media areas are fading away. The textbook "Media and Internet Management" stays abreast of changes and covers this topic on a well-founded and comprehensive basis. It makes a valuable contribution to theory and practice in media management and is highly recommendable to media managers." Christoph Mohn, Chairman of the Supervisory Board, Bertelsmann AG "The world of media is full of challenges and dynamic conditions for its field. The dynamic of this market is accelerated even more by new digital technologies and ongoing globalization. Mierzejewska, Editor of The International Journal on Media Management, Fordham University, New York "Summed up, with his second edition Wirtz managed to strengthen the outstanding position of his publication "Media Management". It is suitable for business students, lectures as well as managers who can gain magnificent information from it." Prof. Dr. Wolfgang Fritz, Director of the Institute of Marketing, Braunschweig University of Technology, Germany; Honorary Professor at the Institute of Business Administration, University of Vienna, Austria.

**Innovation Exposed** Sarah Schoellhammer 2020-02-05 Collectively led companies are considered more flexible, faster and more innovative. But how are innovations developed in heterarchical, that is non-hierarchical or agile organizations? What can we learn for classical innovation management and organizations? In a multiple case study approach, Sarah Schoellhammer describes the innovation practices of one small, two medium-sized and two large distinctive European heterarchies from different industries. Their non-hierarchical innovation mechanisms are analyzed across the five cases and compared to classic innovation management along the dimensions strategy and direction, structures and processes, as well as culture and leadership. The author develops a model on innovation in heterarchies, being exposed rather than sheltered, and describes implications for practitioners of innovation and organization in more classic organizations on the individual, project team, and organizational level.
