Foundations of Systematics and Biogeography David M. Williams 2007-11-19 Anyone interested in comparative biology or the history of science will find this myth-busting work genuinely fascinating. It draws attention to the seminal studies and important advances that have shaped systematic and biogeographic thinking. It traces concepts in homology and classification from the 19th century to the present through the provision of a unique anthology of scientific writings from Goethe, Agassiz, Owen, Naef, Zangerl and Nelson, among others.

Resources in Education 1998

Museum Education at the Art Institute of Chicago Art Institute of Chicago 2003 This special issue of Museum Studies explores the broad history and practice of art education at the Art Institute, charting the museum's past, present, and future vision of what museum education can be and do. Drawing from a rich trove of archival, oral, and photographic resources, authors offer a lively account of museum education as an evolving profession, an outlet for aesthetic and political programs, and a crucial element of the Art Institute's public mission from the moment of its founding in 1879. The project, sponsored by the Woman's Board of The Art Institute of Chicago to commemorate its fiftieth anniversary, also explores that group's signal commitment to education and volunteerism at the museum, which has ranged from creating suburban community associations to sponsoring a corps of volunteer docents, from establishing a pioneering children's museum to planning celebrations that open the Art Institute's doors to the widest possible public. A pathbreaking effort, this publication constitutes an important, unique contribution to the history of education in American cultural institutions.

Selbstbild Carol Dweck 2016-05-02 Spitzensportler, Geigenvirtuosen, Elitestudenten, Karrieremenschen – in der Regel sprechen wir Erfolge den Begabungen des Menschen zu. Doch dieser Glaube ist nicht nur falsch, er hindert auch unser persönliches Fortkommen und schränkt unser Potenzial ein. Die Psychologin Carol Dweck beweist: Entscheidend für die Entwicklung eines Menschen ist nicht das Talent, sondern das eigene Selbstbild. Was es damit auf sich hat, wie Ihr eigenes Selbstbild aussieht und wie Sie diese Erkenntnisse für sich persönlich nutzen können, erfahren Sie in diesem Buch.
