 Benchmarking Telemedicine: Improving Health Security in the Balkans C.S. Stone 2017-10-25 Health security is dependent on many factors such as: individual government policies and regulations; budgets; management systems; and the collection, analysis, use, and protection of data. Telemedicine has the potential to change how healthcare is delivered around the world, and has developed to the point where it is possible for its use to become commonplace. The questions are, however, whether and how the use of telemedicine will improve health security in Southeast Europe. This book presents papers from the NATO Advanced Research Workshop (ARW) on Benchmarking Telemedicine: Improving Health Security in the Balkans, held in Skopje, Macedonia, in November 2016. The aim of the workshop was to bring together people from a wide range of sectors within the telemedicine community with representatives of NATO Member and Partner countries to share information and develop solutions to health security issues. Participants addressed issues such as cyber security for the implementation of telemedicine; healthcare capabilities of deployed and local medical equipment; learning methods; information sharing among local professionals; prevention and control of infectious diseases; best practices of telemedicine among NATO Member and Partner countries; integration of telemedicine across regions and borders; and telemedicine implementation. The book will be of interest to all those wishing to gain a better insight into the implications of telemedicine for health security.

Appendices: Persistent Traditions Luc W.S.W. Amkreutz 2013-12-19 The adoption of agriculture is one of the major developments in human history. Archaeological studies have demonstrated that the trajectories of Neolithisation in Northwest Europe were diverse. This book presents a study into the archaeology of the communities involved in the process of Neolithisation in the Lower Rhine Area (5500-2500 cal BC). It elucidates the role played by the indigenous communities in relation to their environmental context and in view of the changes that becoming Neolithic brought about. This volume contains the appendices to the thesis 'Persistent traditions. A long-term perspective on communities in the process of Neolithisation in the Lower Rhine Area (5500-2500 cal BC)'. These constitute a comprehensive inventory of 159, mostly excavated, archaeological sites in the Lower Rhine Area for which general characteristics were recorded. Their analysis shows that the succession of Late Mesolithic, Swifterbant culture, Hazendonk group and Vlaardingen culture societies represents a continuous long-term tradition of inhabitation of the wetlands and wetland margins of this area, forming a culturally continuous record of communities in the transition to agriculture. The site catalogue forms both an overview of, and detailed introduction into, the site-based archaeology of this time frame. After demonstrating the diversity of the Mesolithic, the subsequent developments regarding Neolithisation are studied from an indigenous perspective. Foregrounding the relationship between local communities and the dynamic wetland landscape, the archaeological evidence regarding its regional inhabitation points to long-term flexible behaviour and pragmatic decisions being made. For the interpretation of Neolithisation this study offers a complementary approach to existing research. Instead of arguing for a short transition based on the economic importance of domesticates and cultigens at sites, the emphasis is placed on the persistent traditions of the communities involved. New elements, instead of bringing about radical changes, are shown to be attuned to existing hunter-gatherer practices. By documenting indications of the mentalité of the inhabitants of the wetlands, it is demonstrated that their mindset remained essentially 'Mesolithic' for millennia.

Screens and Scenes Richard Kern 2018-06-21 This book examines the relationships between online visual interfaces and language use in educational contexts and the features that underpin them to explore the complex nature of online communication and its implications for educational practice. Adopting a case study approach featuring a global range of examples, the volume uniquely focuses on multimodal intercultural interactions, with a particular interest in videoconferencing, to look at how they project and reflect particular cultural values and tendencies concerning language use and how they elucidate the complex cultural identifications and affiliations inherent in intercultural encounters. The book employs a diverse range of theoretical and research frameworks to highlight the dynamic connections between digital technology, social life, and language use, and the ways in which they can inform language education, making this an ideal resource for students and scholars in applied linguistics, communication studies, media studies, information studies, and education.

Membrane Biophysics Hongda Wang 2017-11-21 This book highlights recent advances in and diverse techniques for exploring the plasma membrane's structure and function. It starts with two chapters reviewing the history of membrane research and listing recent advances regarding membrane structure, such as the semi-mosaic model for red blood cell membranes and the protein layer-lipid-protein island model for nucleated tissue cell membranes. It subsequently focuses on the localization and interactions of membrane components, dynamic processes of membrane transport and transmembrane signal transduction. Classic and cutting-edge techniques (e.g. high-resolution atomic force microscopy and super-resolution fluorescence microscopy) used in biophysics and chemistry are presented in a very comprehensive manner, making them useful and accessible to both researchers in the field and novices studying cell membranes. This book provides readers a deeper understanding of the plasma membrane's organization at the single molecule level and opens a new way to reveal the relationship between the membrane's structure and functions, making it essential reading for researchers in various fields.

Fine Art Printing für FotografenJürgen Gulbins 2018-05-25 Digitale Kameras liefern bereits heute Bilddaten, die eine großformatige Ausgabe in höchster Qualität erlauben. Aber auch die Drucktechnik hat mit der Entwicklung der Bildsensoren Schritt gehalten: Inkjet-Systeme mit höchster Präzision und Auflösung, Tinten, die feinste Tonwertabstufungen darstellen können und langfristige Farbstabilität bieten – und das alles zu Preisen, die auch für den anspruchsvollen Amateur erschwinglich sind. Fine Art Printing ist kein Buch über Drucktechnik, sondern ein Buch von Fotografen für Fotografen. Es zeigt Ihnen, wie man einen geeigneten Drucker auswählt, wie man hochwertige Fotodrucke mit guten Inkjet-Druckern herstellt und wie man den fotografischen Workflow zur optimalen Vorbereitung der Bilddaten anlegt. Das Buch erläutert, wie man diesen letzten Arbeitsschritt in der "digitalen Dunkelkammer" meistert, um perfekte, ausstellungsreife und langlebige Drucke zu erzeugen. Die nötigen Grundlagen des Farbmanagements und der Profilerstellung werden ebenso behandelt wie die Auswahl geeigneter Drucker, Papiere und Tinten sowie das Optimieren der Fotos für den Druck. Auch die Nachbehandlung der gedruckten Bilder und Möglichkeiten der Bildpräsentation werden angesprochen. Die 5. Auflage berücksichtigt neben Photoshop 5,6 und CC neue Filter, aktuelle RIPs sowie neue Druckertypen und Papierarten. Es deckt auch ausführlich das Drucken auf

Lightroom (inklusive Lightroom Classic) ab. Es ist damit das einzige deutschsprachige Buch in dieser Tiefe und Vollständigkeit.

Telehealth in the Developing World Richard Wootton 2009-02-24 Health care is primarily about people-to-people interactions. It is about understanding, diagnosis, physical contact, communication, and, ultimately, providing care. By bringing people together, telecommunication technologies have the potential to improve both the quality of and access to health care in the remotest areas of the developing world. Telemedicine offers solutions for emergency medical assistance, long-distance consultation, administration and logistics, supervision and quality assurance, and education and training for healthcare professionals and providers. This book aims to redress the relative lack of published information on successful telehealth solutions in the developing world. It presents real-life stories from Asia, Africa, and Latin America. It is rich in practical experience and will be of interest to health professionals, development workers, and e-health and telehealth proponents interested in learning about, or contributing to the implementation of, appropriate solutions for 80% of the world's population.
