Journals of the Legislative Council Tasmania. Parliament. Legislative Council 1860 Includes its Papers. History of Mathematical Sciences: Portugal and East Asia V Saraiva Luis M R 2018-06-13 In recent years, research on the history of early modern cartography has undergone remarkable developments. At the same time, European travel accounts and works on China and Japan are also being investigated more systematically. Finally, studies of translations between European and East Asian languages have highlighted the more general issue of how and to what extent representations of the world that prevailed at one end of Eurasia informed and influenced the representations prevailing at the other end of the continent, sometimes to the point that novel forms of representations were being generated. This volume brings together a series of essays on this theme. It is divided into five sections which address as many topics: the textual representation of the 'Other'; 16th- and 17th-century maps of China, Japan and Vietnam; the phenomenon of hybridisation in visual representations; knowledge and representations of the world in Europe and East Asia; and the circulation of representations of the heavens in astronomy between these two regions.

The Ancient World: History in Maps

A Student's Study-Guide in Ancient History Gertrude van Duyn Southworth 2016-10-07 Excerpt from A Student's Study-Guide in Ancient History: A Combination of Outlines, Map Work and Questions to Aid in Visualizing, Understanding and Remembering the Important Facts of Ancient History, and in Grasping a Sense of the Modern World's Debt to the Peoples of Ancient Times The book contains thirty-seven outline maps. These the student should use to fix the historical geography of Ancient History. Map work of this sort is demanded today. It will help fix the subject in a way which cannot possibly be done even by continual reference to the maps in the textbook. It aids greatly in quickly fixing the spelling of the many unfamiliar names which the student encounters, creates a more vivid picture of the geography of Ancient History, and gives a clearer understanding of causes than could otherwise be gained. Side by side with the maps are questions which rivet attention upon the essentials - the leading men and the political, commercial and intellectual growth of the various periods. These questions are based on the outline given in the early part of the book. To answer them the student must read.
