U.S. History, Grades 6 - 8 Victor Hicken 2008-09-02 Bring history to life for students in grades 6 and up using U.S. History: People Who Helped Make the Republic Great (1620–Present)! This 128-page book provides a full-spectrum view of some of the most fascinating and influential lives in U.S. history. It features biographical sketches of historically famous personalities, such as Benjamin Franklin and Booker T. Washington, and the lesser-known figures, like Dorothea Lynde Dix. The book includes time lines and research questions and works perfectly as a full unit or classroom supplement. It supports NCSS standards and the National Standards for History.

Designing Your Own Classical Curriculum Laura Berquist 1998-01-01 ÉHome educator Laura Berquist presents a modern curriculum based on the time-tested philosophy of the classical Trivium—grammar, logic and rhetoric. She has given homeschoolers a valuable tool for putting together a "liberal arts" curriculum that feeds the soul, as well as the intellect. Her approach, covering grades K - 12, is detailed and practical, and it is adaptable by parents and teachers to any situation. This third revised edition includes a much expanded section for a high school curriculum, and an updated list of resources for all grades.

Bulletin - Bureau of Education United States. Bureau of Education 1909
History of Mathematical Sciences: Portugal and East Asia V Saraiva Luis M R 2018-06-13
In recent years, research on the history of early modern cartography has undergone remarkable developments. At the same time, European travel accounts and works on China and Japan are also being investigated more systematically. Finally, studies of translations between European and East Asian languages have highlighted the more general issue of how and to what extent representations of the world that prevailed at one end of Eurasia informed and influenced the representations prevailing at the other end of the continent, sometimes to the point that novel forms of representations were being generated. This volume brings together a series of essays on this theme. It is divided into five sections which address as many topics: the textual representation of the 'Other'; 16th- and 17th-century maps of China, Japan and Vietnam; the phenomenon of hybridisation in visual representations; knowledge and representations of the world in Europe and East Asia; and the circulation of representations of the heavens in astronomy between these two regions.
