Space Peter Merriman 2022-02-10 Space is the first accessible text which provides a comprehensive examination of approaches that have crossed between such diverse fields as philosophy, physics, architecture, sociology, anthropology, and geography. The text examines the influence of geometry, arithmetic, natural philosophy, empiricism, and positivism to the development of spatial thinking, as well as focusing on the contributions of phenomenologists, existentialists, psychologists, Marxists, and post-structuralists to how we occupy, live, structure, and perform spaces and practices of spacing. The book emphasises the multiple and partial construction of spaces through the embodied practices of diverse subjects, highlighting the contributions of feminists, queer theorists, anthropologists, sociologists, and post-colonial scholars to academic debates. In contrast to contemporary studies which draw a clear line between scientific and particularly quantitative approaches to space and spatiality and more 'lived' human enactments and performances, this book highlights the continual influence of different mathematical and philosophical understandings of space and spatiality on everyday western spatial imaginations and registers in the twenty-first century. Space is possibly the key concept underpinning research in geography, as well as being of central importance to scholars and practitioners working across the arts, humanities, social sciences, and physical sciences.

International Encyclopedia of Human Geography 2019-11-29 International Encyclopedia of Human Geography, Second Edition embraces diversity by design and captures the ways in which humans share places and view differences based on gender, race, nationality, location and other factors—in other words, the things that make people and places different. Questions of, for example, politics, economics, race relations and migration are introduced and discussed through a geographical lens. This updated edition will assist readers in their research by providing factual information, historical perspectives, theoretical approaches, reviews of literature, and provocative topical discussions that will stimulate creative thinking. Presents the most up-to-date and comprehensive coverage on the topic of human geography Contains extensive scope and depth of coverage Emphasizes how geographers interact with, understand and contribute to problem-solving in the contemporary world Places an emphasis on how geography is relevant in a social and interdisciplinary context

The Primary Teacher's Guide to the New National Curriculum Kate Ashcroft 1995 The Primary Teacher's Guide to the New National Curriculum provides a quick and accessible overview of the curriculum arrangements that came into force in August 1995. The revised National Curriculum has affected the content and modes of delivery of the primary curriculum. The book outlines the main changes, provides examples of creative ways of delivering the new curriculum and provides enquiry tasks to take the reflective teacher forward. It covers each of the subjects of the new National Curriculum and religious education, locates them within a context of whole curriculum planning, looks at issues of differentiation and explores those additional elements of the curriculum that good primary schools will wish to cover. With its easy-to-read style and practical focus, this book is an essential text for all teachers and student teachers in primary schools who have a minimum amount of time to read and absorb the new Orders. Such teachers will appreciate a book which clearly and succinctly identifies the changes and their implications for practice.

Human Geography Mark Boyle 2021-04-12 Revised, Extended, and Extensively Updated Text Uses Historical Geographical and Thematic Approach to Provide Undergraduates with a Firm Foundation in Human Geography Drawing on nearly three decades of instructional experience and a wealth of testing pedagogical innovations with students, Mark Boyle has revised and expanded this authoritative and comprehensive introduction to Human Geography. As with the First Edition, Boyle follows the premise that "history makes geography whilst geography makes history," and that the key to studying the principal demographic, social, political, economic, cultural and environmental processes in any region in the world today is to look at how that region has been impacted by, and in turn has impacted, the story of the rise, reign, and decline of the West. Moreover he argues that Human Geography itself is best understood as both an intellectual endeavour and a historical, political, and institutional project. Informed by recent developments in post-colonial scholarship, the book covers key concepts, seminal thinkers, and influential texts in the field. Although designed for the beginner student, Boyle does not shy away from ideas and debates often avoided in introductory texts, clearly communicating theory without condescension. In addition, he places human geography in its larger academic context, discussing the influences on the field from related subjects. Notable features in the Second Edition include: Extensive revision and updating of coverage of key ideas, developments, debates and case studies New chapter on uneven geographical development at different scales and development theory and practice Dedicated coverage of Covid-19s geographies New learning resources (figures, tables, plates, maps, Deep Dive boxes, etc.) throughout the text, plus learning objectives, essay questions, checklists summarizing key ideas, and guidance for further reading Updated and expanded companion website with MP4 and MP3 chapter-by-chapter lectures and PowerPoint slides for each chapter, new multiple-choice exam paper and additional essay-style exam questions, and a wide range of student tutorial exercises Human Geography: An Essential Introduction, Second Edition is an excellent foundational text for undergraduate courses in human geography, globalization, Western civilization, historiographies of intellectual thought, the grand public problems confronting humanity in the twenty first century, and other wider social science courses.
