Altmetrics for Information Professionals Kim Johan Holmberg 2015-09-03 The goal of any research assessment is to evaluate the value or quality of the research in comparison to other research. As quality is highly subjective and difficult to measure, citations are used as a proxy. Citations are an important part of scholarly communication and a significant component of research evaluation, with the assumption being that highly cited work has influenced the work of many other researchers and hence it is more valuable. Recently we have seen new online data sources being researched for this purpose and disruptive ideas with the power to change research assessment, and perhaps even science as a whole, have been born. Altmetrics is the new research area that investigates the potential of these new data source as indicators of the impact that research has made on the scientific community and beyond, and thus possibly also as indicators of the societal impact of research. This book will present some of these new data sources, findings from earlier altmetrics research, and the disruptive ideas that may radically change scholarly communication. Presents some of the key ideas and innovations in earlier research that have been driving the evolution from bibliometrics to webometrics, and with the advent of social media to altmetrics Discusses the shortcomings and pitfalls of bibliometrics in research evaluation and the potential of altmetrics to overcome some of these shortcomings Presents some of the most important data sources of altmetrics, the aggregators, and the different stakeholders Reviews current research about altmetrics and discusses possible future trends Presents a way to measure and aggregate altmetrics according to the level of impact or type of impact they represent

Technik - Handeln - Wissen Werner Rammert 2007-11-19 Technik, Handeln und Wissen sind zentrale Begriffe soziologischer Theorie, könnte man meinen. Ein Blick in die Literatur belehrt einen schnell: Für Handeln und Wissen gilt das sicherlich, aber für Technik wohl kaum. Auf Handlungstheorie kann in keiner Sozialtheorie verzichtet werden. Wissenssoziologie spaltet sich in eine besondere sozialtheoretische Tradition und in das Feld einer Spezialsoziologie auf. Techniksoziologie blieb bisher nur eine Bindestrichsoziologie. Das soll sich ändern. Diese Lücke mangelnden Technikbezugs in der Sozial- und Gesellschaftstheorie zu füllen ist ein Anliegen dieses Buches.

The Divided City and the Grassroots Giulia Carabelli 2018-03-14 Focusing on Mostar, a city in Bosnia Herzegovina that became the epitome of ethnic divisions during the Yugoslav wars, this cutting edge book considers processes of violent partitioning in cities. Providing an in-depth understanding of the social, political, and mundane dynamics that keep cities polarized, it examines the potential that moments of inter-ethnic collaboration hold in re-imagining these cities as other than divided. Against the backdrop of normalised practices of ethnic partitioning, the book studies both 'planned' and 'unplanned' moments of disruption; it looks at how networks of solidarity come into existence regardless of identity politics as well as the role of organised grassroots groups that attempt to create more inclusive; and it critically engages with urban spaces of resistance. Challenging the representation of the city as merely a site of ethnic divisions, the author also explores the complexities arising from living in a city that validates its citizens solely through ethnicity. Elaborating on the relationships between space, culture and social change, this book is a key read for scholars, students, and urban practitioners studying ethnically divided cities worldwide.

Burmese Silver Art: Masterpieces Illuminating Buddhist, Hindu and Mythological Stories of Purpose and Wisdom David C. Owens 2020-06-15 Burmese master silversmiths produced a magnificent body of work from the mid-19th to the early 20th centuries – the Burmese Silver Age. This aesthetic and functional work is characterized by a unique decorative style and superb technical artistry. Many of the artefacts are embellished with mysterious visual narratives drawn from ancient religious and mythological sources, communicating spiritual beliefs and values that resonate to this day. Burmese silverwork is a distinct and little-known genre of silver art. This book tackles this obscurity by illuminating and describing for the first time 100 Burmese silver artefacts in a stunning photographic gallery. This silverwork – from the Noble Silver Collection – represents some of the rarest and finest quality work from the Burmese Silver Age. The centrepiece gallery of silverwork masterpieces is bookended by two well-illustrated and informative chapters that provide readers with deeper insights into Burmese silverwork: a robust frame of reference chapter summarises the 2,000-year history and cultural tradition of Burmese silverwork; and a chapter following the gallery deciphers the complex and allegorical iconography of the decoration, which gives the reader a deeper appreciation of its religious and cultural meaning and origin. This book captures the great, almost mystical, allure of Burmese silverwork – from the sublime artistry of the decoration, to the extraordinary skill of the silversmith and the profound meaning and importance of the visual narratives. In doing so, Burmese Silver Art takes its place as a definitive reference work for any art historian, collector, expert, student, or general reader interested in this hitherto-overlooked body of noble art.

Wehrmacht Generals, West German Society, and the Debate on Rearmament, 1949-1959 Alaric Searle 2003 Examining the fate of former German generals after the Second World War, this is one of the first books in English to utilize the extensive archival material now available on the West German rearmament debate. Focus is given to the role these generals played in military policy-making, in planning for democratic armed forces, and in public discussions on coming to terms with the National Socialist past. Alaric Searle uncovers proof that some former generals tried to bypass parliamentary control of the Federal armed forces, while others intervened to thwart those efforts.

Alexander von Humboldt und die Erfindung der Natur Andrea Wulf 2016-10-11 Was hat Alexander von Humboldt, der vor mehr als 150 Jahren starb, mit Klimawandel und Nachhaltigkeit zu tun? Der Naturforscher und Universalgelehrte, nach dem nicht nur unzählige Straßen, Pflanzen und sogar ein »Mare« auf dem Mond benannt sind, hat wie kein anderer Wissenschaftler unser Verständnis von Natur als lebendigem Ganzen, als Kosmos, in dem vom Winzigsten bis zum Größten alles miteinander verbunden ist und dessen untrennbarer Teil wir sind, geprägt. Die Historikerin Andrea Wulf stellt in ihrem vielfach preisgekrönten – so auch mit dem Bayerischen Buchpreis 2016 – Buch Humboldts Erfindung der Natur, die er radikal neu dachte, ins Zentrum ihrer Erkundungsreise durch sein Leben und Werk. Sie folgt den Spuren des begnadeten Netzwerkers und zeigt, dass unser heutiges Wissen um die Verwundbarkeit der Erde in Humboldts Überzeugungen verwurzelt ist. Ihm heute wieder zu begegnen, mahnt uns, seine Erkenntnisse endlich zum Maßstab unseres Handelns zu machen – um unser aller Überleben willen.

European Enlargement across Rounds and Beyond Borders Haakon A. Ikonomidou 2017-03-16 Enlargement has been an almost constant part of European integration history – going from an improvised exercise to the EU's most developed foreign policy tool. However, neither the longevity nor the complexity of enlargement has been properly historicised. European Enlargement across Rounds and Beyond Borders offers three interdisciplinary, innovative, and indeed radical, new ways of understanding and analysing EC/EU enlargements: first, tracing Longue Durée developments; second, investigating enlargement Beyond the Road to Membership; and third, exploring the Entangled Exchanges and synergies between the EC/EU and its outside. This edited volume will provide fresh perspectives on enlargement as one of the defining processes in Europe in the second half of the 20th century: How are we to understand enlargement as a policy? How has it changed the EU? What is the historical role of the British press in shaping the UK's visions of Europe? How has enlargement played into Russia's relationship with today's EU? Giving answers to these questions, and many more, this volume wishes to spark a broad debate about the roots, range, and repercussions of enlargement, and how historians, and other scholars, should engage with it. This publication will be of key interest to scholars and students of modern European history and politics, the European integration process, EU studies, and more broadly multilateral international institutions, history, law and the social sciences.

Democracy in Southern Europe Isabelle Calleja Ragonesi 2019-02-28 How have Malta and Cyprus - both

EU members – transitioned from colonial island states to independent democracies? With the assistance of primary documentation this book traces the difficult path of these two states to becoming independent liberal democracies by using the pathway of democratization through decolonization. Using socio-economic and political data, analysed through the microscope of political science and international relations theories, Isabelle Calleja Ragonesi charts the progress of the two islands in the context of a number of four distinct phases. Firstly decolonization, independence and achieving the status of procedural democracies; secondly post-colonial independence consolidating democracy and regime breakdown; thirdly sovereign nation-state status and second attempts at consolidating democracy and finally attempting to reach substantive democracy status and EU membership. The study of these two states is contextualized within the context of democratization in Southern Europe and the cases of Malta and Cyprus provide new insights on the region for scholars of political science and international institutions.

International Monetary Fund Annual Report 2014 International Monetary Fund. Secretary's Department 2014-10-03 Seven years after the onset of the global financial crisis, the world still has a way to go to secure a sustainable recovery marked by strong growth that supports rapid job creation and benefits all, International Monetary Fund (IMF) Managing Director Christine Lagarde says in her foreword to the institution's Annual Report 2014—From Stabilization to Sustainable Growth, published today. "The recovery is ongoing, but it is still too slow and fragile, subject to the vagaries of financial sentiment. Millions of people are still looking for work. The level of uncertainty might be diminishing, but it is certainly not disappearing." Ms. Lagarde said that "throughout the crisis and in the recovery period, the IMF has been, and continues to be, an indispensable agent of economic cooperation" for its membership. The report covers the work of the IMF's Executive Board and contains financial statements for the year May 1, 2013, to April 30, 2014. It describes the IMF's support for its 188 member countries, with an emphasis on the core areas of IMF responsibility: assessing their economic and financial policies, providing financing where needed, and building capacity in key areas of economic policy.

It focuses on understanding how public policies and power dynamics shape gendered vulnerabilities and impacts, how gender influences coping and adaptation mechanisms, and how civil society organizations incorporate gender into their climate advocacy strategies.

Sino-U.S. Energy Triangles David Zweig 2015-07-24 The remarkable performance of the Chinese economy in the last three decades has placed China at the centre of the world stage. In 1993, China became a net importer of energy, although it was not until the early 2000s that the world began to pay more

attention to China's energy needs and its potential impact on the world. With China's energy search occurring within a hegemonic global structure dominated by the United States, the US watches with interest as China enhances its ties with energy-rich states. The book examines this triangular relationship and questions whether the US and China are in competition regarding access to the energy of a third state, within the context of a potential power transition. It includes case studies on China's energy relationship with countries such as Canada, Australia, Saudi Arabia, Nigeria, Brazil, Kazakhstan, Iran, Sudan and Venezuela and aims to understand the way a rising power interacts with the existing leading power and the possible outcome of this competition. The analytical framework employed helps the reader to understand not only the nature and pattern of triangles among US, China and the Resource Rich States under 'resource diplomacy', but also the salient features of US-China competition around the world. Making an impressive contribution to the literature in fields such as US-China relations, international relations, Chinese foreign policy and global energy geopolitics, this book will appeal to students and scholars of these subjects.

Gleichheit ist Glück Kate Pickett 2012-12-14 In jahrzehntelanger Forschung haben die beiden Wissenschaftler Richard Wilkinson und Kate Pickett empirische Daten gesammelt und ausgewertet, anhand derer sie den Einfluss der Ungleichheit auf eine Vielzahl der drängendsten sozialen Probleme entwickelter Gesellschaften untersuchen. Die geistige und körperliche Gesundheit oder der Drogenkonsum der Mitglieder einer Gesellschaft, Lebenserwartung, Übergewicht, Bildung, die Geburtenrate bei Minderjährigen, die Verbrechensrate und nicht zuletzt die soziale Mobilität: All diese Phänomene hängen statistisch eindeutig davon ab, wie ungleich die Einkommens- und somit Chancenverteilung einer Gesellschaft ist. Ab einem gewissen Einkommensniveau, das etwa auf der Höhe dessen von - ausgerechnet - Kuba liegt, ist es eben nicht mehr die Höhe des Durchschnittseinkommens, die es den Menschen immer besser gehen lässt, sondern die Verteilung des Einkommens. Dieser Titel befasst sich, wie das zur Zeit viel besprochene Buch von Thomas Piketty, *Das Kapital im 21. Jahrhundert*, mit der Verteilung des Reichtums.

Human Security in Disease and Disaster Natasha Lindstaedt 2021-09-20 This timely new textbook lays bare the ways in which disease and disaster can turn politicians into global leaders or national liabilities. It explains the impact of crises on development and human security and explores how states and societies can respond more effectively. Written primarily for the student of politics, but also drawing from public health, public policy, and environmental studies, the book investigates the threats posed by disease and disasters, and demonstrates how states can shape the ways in which these crises unfold. Case studies include: • Diseases such as Covid-19 and Ebola • Natural disasters such as Typhoon Haiyan and the 2010 Haiti earthquake • Manmade disasters such as the Yemen and Congo civil wars or famine The book delves deep into how state response to these challenges can impact political and economic stability and ends by exploring the role played by international institutions and international cooperation in addressing common challenges. This introductory textbook is perfect for undergraduate and masters courses exploring the expanding politics and human security issues surrounding disease and disasters. It will also be of interest to think tanks and policy communities looking for fresh insights to bring into professional practice.

The Albergo Diffuso Model Maurizio Drolì 2019-12-16 *The hospitality model called "Albergo Diffuso" (AD), or "scattered hotel," has been engineered by Mr Giancarlo Dall'Ara and described by The New York Times as a way of bringing life back to historic towns and rural hamlets by utilizing unused rooms for tourism. This "simple but genial" model devised in Italy in the mid-90's received an award from the UNDP for its sustainability, but despite the spread of AD's, no peer-reviewed books have previously been published in English focusing on this innovation. In this book, the author therefore begins by exploring the AD as a community-based hospitality model, examining both its pros and cons. He then considers conviviality, sense of security, and other factors that Hans Magnus Enzensberger referred to as luxuries of our time for urban dwellers. These represent the key pre-requisites a location must possess to be deemed suitable for this innovation. Next, investors and co-interested private, public and not-for-profit associations are provided with a structured framework to help them achieve a defensible competitive advantage by harnessing the economic potential of valuable, rare, inimitable and non-substitutable (VRIN) resources. The final section assesses the AD as a business model, evaluating various aspects at the heart of any business plan.*
