**Shared Leadership in Higher Education** Elizabeth M. Holcombe 2021-12-06 Today's higher education challenges necessitate new forms of leadership. A volatile financial environment and the need for new business models and partnerships to address the impact of new technologies, changing demographics, and emerging societal needs, demand more effective and innovative forms of leadership. This book focuses on a leadership approach that has emerged as particularly effective for organizations facing complex challenges: shared leadership. Rather than concentrating power and authority in an individual leader at the top of an organization, shared leadership involves multiple people influencing one another across varying levels and at different times. It is a flexible, collective, and non-hierarchical approach to leadership. Organizations that have implemented shared leadership have been better able to learn, innovate, perform, and adapt to the types of external challenges that campuses now face and that will continue to shape higher education in the future. This book brings together the two foremost scholars of higher education who have studied, described and evaluated the impact of shared leadership, a university chancellor with prior experience of facilitating systemic institutional change at two university systems, and the former president of three universities where she coordinated processes that led to the transformational changes needed to renew institutional mission and purpose. Opening with four chapters that define the nature of shared leadership, describe its key characteristics, and how to build institutional capacity, the book then presents ten institutional cases. Ranging from institution-wide initiatives at four year colleges and a community college, to examples of managing change in a college, a center, and across STEM departments, the contributing authors describe the context and drivers of the need for change, the building of shared vision to create coalitions, lessons learned, and outcomes. Intended as a resource for leaders at the highest levels such as Presidents and Provosts as well as mid-level leaders such as deans, directors, and department chairs, the book is also addressed to faculty and staff who are interested in collaborating with campus leaders on institutional decision-making or creating new change initiatives. It is intended to build capacity for shared leadership across institutions and for use in leadership courses and programs.

**Transforming Digital Learning and Assessment** Peggy L. Maki 2021-03-16 Responding to both the trend towards increasing online enrollments as the demand for face-to-face education declines, and to the immediate surge in remote learning owing to the COVID-19 pandemic, this book provides vital guidance to higher education institutions on how to develop faculty capacity to teach online and to leverage the affordances of an ever-increasing array of new and emerging learning technologies. This book provides higher education leaders with the context they need to position their institutions in the changing online environment, and with guidance to build support in a period of transition. It is intended for campus leaders and administrators who work with campus teams charged with identifying learning technologies to meet an agreed upon program- or institution-level educational needs; for those coordinating across campus to build consensus on implementing online strategies; and for instructional designers, faculty developers and assessment directors who assist departments and faculty effectively integrate learning technologies into their courses and programs. It will also appeal to faculty who take an active interest in improving online teaching. The contributors to this volume describe the potential of artificial intelligence algorithms, such as those that fuel learning analytics software that mines LMS data to enable faculty to quickly and efficiently assess individual students' progress in real time, prompting either individual attention or the need to more generally clarify concepts for the class as whole. They describe and provide access to a hybrid professional development MOOC and an associated WIKI that curate information about a wide range of learning software solutions currently available; and present case studies that offer guidance on building the buy-in and consensus needed to successfully integrate learning technologies into course, program- and institution-level contexts. In sum, this book provides readers with a comprehensive understanding of the technological capabilities available to them and identifies collaborative processes related to engaging and building institutional support for the changes needed to provide the rapidly growing demand for effective and evidence-based online learning.

**International Perspectives on Leadership in Higher Education** Alasdair Blair 2022-11-21 As complex, large institutions, universities present unique challenges for leaders. In addition to an integrated workbook readers will find: recommendations for steps with each strategy in an implementation rubric reflection questions to promote deeper thinking on SEL resources to explore at the end of each chapter

**Teaching 2030** Barnett Berry 2011-01-01 In the raging controversy over the purpose of public education and how to fix the nation's underperforming schools, the voices of America's best teachers are seldom heard. Now for the first time, in a provocative book about the future of teaching and learning, 12 of America's most accomplished classroom educators join a leading advocate for a 21st-century teaching profession to bring expert pedagogical know-how and fresh and provocative policy ideas to the national school reform debate. Together they identify four emergent realities that will shape the learning experience of children born in the New Millennium, and propose six levers of change that can ignite a bright future for students by ensuring they all have access to excellent teaching.

**A Guide for Leaders in Higher Education** Brent D. Ruben 2021-08-27 FIRST EDITION SPECIAL RECOGNITION: Winner of the 2018 Sue DeWine Distinguished Scholarly Book Award, National Communication Association, Applied Communication Division REVIEWS OF THE FIRST EDITION "The book provides frameworks and resources that would be highly relevant for new and aspiring department chairs. In fact, this text is ideally designed to serve as a selection for a book discussion group."—The Department Chair "Succeeds in providing accessible and useful resources to individuals across different leadership roles... As a midpoint between textbook and reference work, it is successful at both and provides a clear and unbiased background to issues facing current leaders."—Reflective Teaching During a time of unprecedented challenges facing higher education, the need for effective leadership – for informal and formal leaders across the organization – has never been more imperative. Since publication of the first edition, the environment for higher education has become more critical and complex. Whether facing falling enrollments, questions of economic sustainability, the changing composition of the faculty and student bodies, differential retention and graduation rates, declining public confidence in the enterprise, or the rise in the use of virtual technologies – not to mention how COVID-19 and an intensified focus on long standing issues of racial and gender representation and equity have impacted institutions and challenged many long-standing assumptions – it is clear that learning on the job no longer suffices. Leadership development in higher education has become essential for advancing institutional effectiveness, which is the focus of this book. Taking into account the imperative issues of diversity, inclusion, and belonging, and the context of institutional mission and culture, this book centers on developing capacities for designing and implementing plans, strategies, and structures; connecting and engaging with colleagues and students; and communicating and collaborating with external constituencies in order to shape decisions and policies. It highlights the need to think broadly about the purposes of higher education and the dynamics of organizational excellence, and to apply these insights effectively in goal setting, planning and change leadership, outcomes assessment, addressing crises, and continuous improvement at both the level of the individual and organization. The concepts and tools in this book are equally valuable for faculty and staff leaders, whether in formal leadership roles, such as deans, chairs, or directors of institutes, committees, or task forces, or those who perform informal leadership functions within their departments, disciplines, or institutions. It can be used as a professional guide, a textbook in graduate courses, or as a resource in leadership training and development programs. Each chapter concludes with a series of case studies and guiding questions.

**Community College Leadership** Pamela L. Eddy 2012-03-12 Two-year colleges are facing major change. The majority will undergo a turnover in college presidencies in the next ten years, at a time when they are being asked to be engines for economic growth, enable more students – and a greater diversity of students – to gain 21st century qualifications, and provide a pathway to higher degrees, all with reduced state and local funding. Recognizing that future community college leaders – at all levels– will manage increasingly complex organizations, and face very different challenges than their predecessors, this book provides a multidimensional model of leadership suited to these new demands and environments. The model addresses issues of leader cognition, race and gender, the importance of culture, and the need for more collaborative modes of communication and decision making to frame and implement change. It recognizes that there is no longer any one way to lead, and that the next generation of leaders will be more diverse, possess experience and qualifications from a wider variety of careers, and follow new pathways to their positions. Leaders in the future will possess a cultural competency that is fostered by being lifelong learners. Through over 75 individual interviews with leaders and campus members, Eddy is able to provide examples of the model's components in practice and to illuminate which experiences proved the most relevant for these leaders on their route to upper administration. She shows how her model intersects with the leadership competencies defined by the American Association of Community Colleges, and proposes strategies for future leadership development. This book is intended for anyone considering a leadership position, at any level, in a community college; for college administrators and boards responsible for leadership development programs; and for individuals in corresponding organizations who conduct training programs for aspiring leaders. Likewise, those employed at four-year universities may find value in the model as a developmental tool.

**Leading Knowledge Management and Learning** Dede Bonner 2000 Because knowledge doesn't happen in a vacuum, you need ways to encourage people to share what they know and foster a free-flowing exchange of ideas. This set of case studies provides ideas and strategies for creating knowledge-friendly workplaces that stimulate continuous learning.

**Better Use of Skills in the Workplace** Collectif 2017-11-02 This joint OECD-ILO report provides a comparative analysis of case studies focusing on improving skills use in the workplace across eight countries. The examples provide insights into the practical ways in which employers interact with government services and policies at the local level. They highlight the need to build policy coherence across employment, skills, economic development and innovation policies, and underline the importance of ensuring that skills utilisation is built into policy development thinking and implementation. Skills utilisation concerns the extent to which skills are effectively applied in the workplace to maximise workplace and individual performance. It involves a mix of policies including work organisation, job design, technology adaptation, innovation, employee-employer relations, human resource development practices and business-product market strategies. It is often at the local level that the interface of these factors can best be addressed.

**Managing Online Learning** John Vivolo 2019-10-02 Managing Online Learning is a comprehensive guide to planning and executing effective online learning programs. **Academic Leadership and Governance of Higher Education** Robert M. Hendrickson 2013-04-29 To meet the new and rapidly changing demands facing today's higher education managers and leaders – from department chairs to trustees – this book offers guidance on how to effectively discharge their responsibilities and how to develop their skills for managing their relationships with internal and external stakeholders. It also provides a broad understanding of the structure and functions of their institution and of the appropriate loci of decision-making. The authors go beyond the "positions" of leadership to emphasize the qualities of creativity, commitment, collaboration, delegation and courage that are essential to steer a unit, college or university through successful and enduring change Recognizing that the hallmark of higher education in the United States is a diversity of institutional types, this book enables the reader to relate issues of environment, organization and management to his or her specific institution, from not only the presidential perspective, but from the vantage point of trustees, provosts, vice presidents, deans, and department heads. By covering all these functions—as well as the role of external

stakeholders—in a single volume, this book offers readers a comprehensive view of how institutions respond to external forces and internal issues, and how these impact organizational structure, functions and decision-making in their roles, and the institution at large. The book is informed by these three essential principles: • Sound institutional decisions must be based on a clearly articulated mission and set of core values; • Successful institutional adaptation to a changed environment must be grounded and aligned with the fundamental mission and core values; and • Successful academic leaders must be able to create and foster partnerships, bringing diverse individuals and interests together around a shared vision and mission grounded in common values. This handbook is divided into five units. The first introduces the reader to the scholarly field of higher education and establishes the contextual framework for the rest of the book. The second investigates the multifaceted and often complex relationships that exist between institutions of higher learning and the external constituencies. The third focuses how college and university presidents and their board of trustees keep an institutional mission focused while adapting to changes in the environment, while the fourth analyzes how colleges and universities fulfill their core mission through shared democratic partnerships. The concluding unit concerns how effective academic leaders implement their institution's academic mission. Both scholarly and accessible, this book is intended to be of interest to a broad audience, ranging from graduate students in higher education administration programs to members of institutional governing boards, and everyone in leadership positions in between. All of the authors have completed graduate work in a higher education administration program, and collectively have had experience with academic administration at every level through to the university presidency. Two of the authors are currently faculty in leading higher programs teaching classes in administration and organizational theory and have published widely in the scholarly field. One has been a member of a governing board. Study questions suitable for leadership training and graduate courses are provided online. See hot link at top right of this page.

**The SEL Coach** Jennifer E. Rogers 2022-07-12 Your guide to transforming SEL ideas into actions and practice into process While social-emotional learning (SEL) is regularly identified as a top priority for student well-being and achievement, effective implementation will not happen on its own. That's what makes the SEL coach critical to success. Effective systems change happens with an SEL coach who has the skills to lead, communicate, analyze, train, collaborate, and innovate. Whether you are brand new to the position or have been an SEL coach for some time, this book will provide you with all the resources and ideas you need to take implementation to the next level. Jennifer Rogers shares the secrets to enriching your coaching skillset, including Data Collection—strategic monitoring of the implementation progress Training—engaging staff in learning and advocating for their needs Communication—listening actively, modeling, and summarizing Team-Leading—creating an environment that is supportive and goal-focused The lessons and examples in this book produce coaching competencies and qualities necessary to transform practices into processes, ideas into action plans, and goals into outcomes. Learn how to be a successful SEL implementor with this strategy-packed guidebook!

**Strategic Diversity Leadership** Damon A. Williams 2013-10-01 In today's world – whether viewed through a lens of educational attainment, economic development, global competitiveness, leadership capacity, or social justice and equity – diversity is not just the right thing to do, it is the only thing to do! Following the era of civil rights in the 1960s and '70s, the 1990s and early 21st century have seen both retrenchment and backlash years, but also a growing recognition, particularly in business and the military, that we have to educate and develop the capacities of our citizens from all levels of society and all demographic and social groups to live fulfilling lives in an inter-connected globe. For higher education that means not only increasing the numbers of diverse students, faculty, and staff, but simultaneously pursuing excellence in student learning and development, as well as through research and scholarship – in other words pursuing what this book defines as strategic diversity leadership. The aim is to create systems that enable every student, faculty, and staff member to thrive and achieve to maximum potential within a diversity framework. This book is written from the perspective that diversity work is best approached as an intellectual endeavor with a pragmatic focus on achieving results that takes an evidence-based approach to operationalizing diversity. It offers an overarching conceptual framework for pursuing diversity in a national and international context; delineates and describes the competencies, knowledge and skills needed to take effective leadership in matters of diversity; offers new data about related practices in higher education; and presents and evaluates a range of strategies, organizational structures and models drawn from institutions of all types and sizes. It covers such issues as the reorganization of the existing diversity infrastructure, building accountability systems, assessing the diversity process, and addressing legal threats to implementation. Its purpose is to help strategic diversity leaders combine big-picture thinking with an on-the-ground understanding of organizational reality and work strategically with key stakeholders and allies. This book is intended for presidents, provosts, chief diversity officers or diversity professionals, and anyone who wants to champion diversity and embed its objectives on his or her campus, whether at the level of senior administration, as members of campus organizations or committees, or as faculty, student affairs professionals or students taking a leadership role in making and studying the process of change. This title is also available in a set with its companion volume, *The Chief Diversity Officer*.

Jayne Johnson, director, Global Leadership Development, General Electric "The 6Ds model provided a powerful framework for designing high-impact learning programs that helped to shape our approach to learning and to align our learning leaders across the organization. The second edition adds insights and tools that make this edition even more relevant, practical, and valuable." Robert Sachs, Ph.D., vice president, Learning and Development, Kaiser-Permanente "Embracing the Six Disciplines has allowed us to develop truly innovative high-impact leadership programs that have changed the trajectory of our firm." Carol Bonett, vice president, leadership development officer, Morgan Stanley Smith Barney LLC

**Leadership for a Better World** NCLP, 2016-10-12 The essential guide to the theory and application of the Social Change Model Leadership for a Better World provides an approachable introduction to the Social Change Model of Leadership Development (SCM), giving students a real-world context through which to explore the seven C's of leadership for social change as well as approaches to socially responsible leadership. From individual, group, and community values through the mechanisms of societal change itself, this book provides fundamental coverage of this increasingly vital topic. Action items, reflection, and discussion questions throughout encourage students to think about how these concepts apply in their own lives. The Facilitator's Guide includes a wealth of activities, assignments, discussions, and supplementary resources to enrich the learning experience whether in class or in the co-curriculum. This new second edition includes student self-assessment rubrics for each element of the model and new discussion on the critical roles of leadership self-efficacy, social perspective, and social justice perspectives. Content is enriched with research on how this approach to leadership is developed, and two new chapters situate the model in a broader understanding of leadership and in applications of the model. The Social Change Model is the most widely-used leadership model for college students, and has shaped college leadership curricula at schools throughout the U.S. and other countries including a translation in Chinese. This book provides a comprehensive exploration of the model, with a practical, relevant approach to real-world issues. Explore the many facets of social change and leadership Navigate group dynamics surrounding controversy, collaboration, and purpose Discover the meaning of citizenship and your commitment to the greater good Become an agent of change through one of the many routes to a common goal The SCM is backed by 15 years of research, and continues to be informed by ongoing investigation into the interventions and environments that create positive leadership development outcomes. Leadership for a Better World provides a thorough, well-rounded tour of the Social Change Model, with guidance on application to real-world issues. Please note that *The Social Change Model: Facilitating Leadership Development* (978-1-119-24243-7) is intended to be used as a Facilitator's Guide to Leadership for a Better World, 2nd Edition in seminars, workshops, and college classrooms. You'll find that, while each book can be used on its own, the content in both is also designed for use together. **Leadership Theory** John P. Dugan 2017-01-30 An interdisciplinary survey text on leadership theory grounded using critical perspectives Leadership Theory is designed specifically for use in undergraduate or graduate classrooms providing a comprehensive overview of essential theories informing the leadership studies knowledgebase. The text infuses critical perspectives in a developmental manner that guides readers through increasingly complex ways in which theory can be deconstructed and reconstructed to enhance practice and advance social justice. The book uses compelling examples, critically reflective questions, and multiple approaches to concept illustration to cultivate readers' abilities to engage as critical learners. At the heart of this are powerful counter-narratives offering a range of insights on the challenges and rewards of leadership. Narratives represent accomplished leaders from across a broad range of fields including Eboo Patel, Mary Morten, Felice Gorordo, and more. The facilitator's guide and instructor's website supplement this with case studies, sample syllabi, structured dialogues, and learning activities tied to each chapter. Leadership texts tend to limit application of theory to a singular disciplinary context, omit important ways in which research evolves the understanding of theory, and/or lack critical evaluation of theories which diminishes the ability to translate theory to practice. This book provides a much-needed solution to these issues. Learn the nature, origin, and evolution of specific theories Understand and apply leadership theories using critical perspectives Consider the influences of ethics and justice, social location, and globalization The rapid expansion of leadership programs has thrown the dearth of suitable primary texts into sharp relief. Instructors forced to cobble together course materials from multiple piecemeal sources will find their much-needed solution in Leadership Theory.

**The Dynamics of Intellectual Capital in Current Era** Muhammad Shahbaz 2021-06-01 This book provides an authoritative, inter-disciplinary, and up-to-date survey of relevant concepts, research areas, and applications of intellectual capital. Until now, the literature had lacked a comprehensive analysis of intellectual capital (IC) in regard to sustainability, block chain, and other related technologies and virtual environments. This book shows the importance of intellectual capital for contemporary organizations: how it contributes to theories of the firm, how it affects organizational performance, how is it linked with the organizational ambidexterity, how it connects to the technological developments like block chain and digital technologies, and what would be its association with sustainability. Central to our thesis is the systemic nature of intellectual capital in organizations: how intellectual capital interacts with and complements other organizational resources and developments. This book also shows as to how applying the notion of intellectual capital to organizations requires us to consider how intangible forms of capital differ from more traditional forms, implying the need for a theory of firm that accommodates a concept of dynamic, heterogeneous intellectual capital. Although a lot has been written on IC, this book proves to be the first with scholastic and action-oriented perspective on as to how a firm can manage its IC to create value. This book also demonstrates as to how the subjective aspects of IC can be measured and what can be their strategic implications. A discussion on IC disclosure also appears in the latter part of the book. In doing so, this book reveals as to how the value creation of today's businesses is driven by the IC. This book also introduces the readers to the new application of IC and its association with the contemporary disruptive technologies. This is a book for IC researchers and academicians who want to understand the diverse aspects of IC, for business managers who want to be at the cutting edge, for those early in their careers who seek a challenging new path, and for the top-level managers of the world who have their eye on the future.

**The Daily SEL Leader** James Bailey 2021-03-16 Everyone in your school community benefits when you invest in YOU. Social-emotional learning is one of the hottest education topics today. Most of the focus, however, has been at the student level. The truth is that school leaders can't implement social-emotional learning effectively if they don't deeply understand it for themselves. A deeper, renewed self-awareness and understanding of your own and others' emotional needs is the key to promoting social-emotional learning across your school. Exploring

and mastering core social and emotional competencies a little at a time with the help of this guide fits perfectly with the daily demands of being a school leader, team leader, or classroom leader. Using the core CASEL skills presented in six modules, this guided journal will help you: Become more self-aware of what each CASEL skill means for leadership Build stronger relationships throughout schools, classrooms, and communities Increase credibility and approachability Engage stakeholders confidently Because human growth and leadership go hand in hand, meeting students, teachers, and colleagues where they are at emotionally will begin a ripple effect and leave a lasting impact on your learning community. To do that, however, you must first focus on developing your own SEL skills.
