*The Anthropocene in Global Media* Leslie Sklair 2020-11-23 This book offers the first systematic study of how the 'Anthropocene' is reported in mass media globally, drawing parallels between the use (or misuse) of the term and the media's attitude towards the associated issues of climate change and global warming. Identifying the potential dangers of the Anthropocene provides a useful path into a variety of issues that are often ignored, misrepresented, or sidelined by the media. These dangers are widely discussed in the social sciences, environmental humanities, and creative arts, and this book includes chapters on how the contributions of these disciplines are reported by the media. Our results suggest that the natural science and mass media establishments, and the business and political interests which underpin them, tend to lean towards optimistic reassurance (the 'good' Anthropocene), rather than pessimistic alarmist stories, in reporting the Anthropocene. In this volume, contributors explore how dangerous this 'neutralizing' of the Anthropocene is in undermining serious global action in the face of the potential existential risks confronting humanity. The book presents results from media in more than 100 countries in all major languages across the globe. It covers the reporting of key environmental issues, such as the impact of climate change and global warming on oceans, forests, soil, biodiversity, and the biosphere. We offer explanations for differences and similarities in how the media report the Anthropocene in different regions of the world. In doing so, the book argues that, though it is still controversial, the idea of the Anthropocene helps to concentrate minds and behaviour in confronting ongoing ecological (and Coronavirus) crises. The Anthropocene in Global Media will be of interest to students and scholars of environmental studies, media and communication studies, and the environmental humanities, and all those who are concerned about the survival of humans on planet Earth.

*Connecting People to Their Oceans: Issues and Options for Effective Ocean Literacy* Angel Borja 2020-03-25 While there is growing evidence of the importance of marine ecosystems for our societies, evidence shows also that pressures from human activities on these ecosystems are increasing, putting the health of marine ecosystems at stake worldwide. Hence, Blue Economy is becoming an important component of future socio-economic development strategies (e.g. this is called Blue Growth in Europe), that eventually can result in increasing pressures at sea, and despite the current regulatory framework (in particular with the Oceans Act, in USA or Canada, and the Marine Strategy Framework Directive, in Europe), it is likely that this situation will continue in the future. Ensuring all those connected to the sea, directly or indirectly, gain a better understanding of the importance of the seas, the human-sea interactions and opportunities to act better and reduce impacts from human pressures, is central to Ocean Literacy (OL). Receiving increasing attention in Europe and USA, OL is a challenge for all parts of society: educators & trainers, children and professionals, civil society and scientists, consumers and policy/decision makers. It is seen as part of the package of solutions that will lead to a change in behavior and practice, thus reducing impacts and resulting in healthier marine ecosystems, whilst allowing development opportunities offered by seas are seized in a sustainable manner. This Research Topic focuses on the issues and options for effective OL worldwide. It discusses: (1) existing experiences in OL (formal and informal education for children, training for professionals, tools for raising awareness of consumers - and of investors in the marine sectors...) and their effectiveness (from understanding better to acting differently); (2) the role OL could play (in interaction with innovation, regulation, economic incentive, social norms...) to support human capital development as key component of sustainable growth; and (3) pre-conditions for effective OL for different sectors and target groups. Questions relevant to OL include: Which knowledge - produced by whom - to share and how? Who to target - and how to effectively reach those targeted? How to design OL initiatives - including by mobilizing those targeted (via living lab approaches e.g.) - to ensure effective OL and pave the way for behavior change? What are the knowledge gaps that limit our capacity to design effective OL? As scientists, it is likely you have many more questions to offer and discuss.

*The Legacy of a Troubled Past* Bernard Cros 2022-06-07 Since the advent of democracy in 1994, South Africa has been engaged in an unprecedented exercise of national soul-searching, torn between the need to lay to rest centuries of racial conflict and the desire to come to terms with its traumatic history. This book asks whether the country has begun to turn the corner on the legacy of collective hurt. To do so it ranges in scope across 350 years of South African history, encompassing the struggle against the apartheid regime, the downfall of white supremacy, the Truth and Reconciliation Commission and the first 25 years of democracy, up to more recent movements, such as #RhodesMustFall, or the inequities into the 2012 Marikana massacre, that point to the persistence of traumatic memory in contemporary society. The authors assembled here set out to analyse the representation of such memory, how it has been woven into narratives, recorded, preserved and questioned, and how issues of individual and collective responsibility have been grafted onto it through the visual arts, literature, political discourse and public action. In focusing on memory along with its derived forms of memorialization, collective memory, nostalgia, or post-memory, our contributors pose a fundamental question: is South Africa finally coming to the end of the post-apartheid transition period? Do the decades of memory work on racial violence and repression examined here hold out hope for the nation to make peace with its past?

All about the Bass Scott R. Burson 2021-05-26 Many Christians are engaged in a bass-pounding culture war in which fidelity to our tribe demands a constant call to arms. This antagonistic posture, however, erects walls, deepens divides, and mutes empathy. All about the Bass takes a different approach by offering fresh and faithful sheet music. Using the metaphor of an audio equalizer, Dr. Scott Burson proposes ten action steps designed to turn up the treble of empathic compassion without compromising the bass of righteous conviction. In the first extensive Christian engagement with Jonathan Haidt's Moral Foundations Theory, All about the Bass is academically grounded, yet written for a broad audience. Filled with practical advice and elevating stories of hope, it will inspire readers to move from hostility to hospitality. If you have been longing to sing a better song in our discordant world, All about the Bass is the book for you.

*Telling Stories Differently* Janet Condy 2015-09-01 The aim of this book is to share a relatively loose collection of studies using digital storytelling as a pedagogical tool in Cape Peninsula University of Technology (CPUT). The book takes an informed social justice approach to teaching and learning, at the heart of which is the exploration of DST as a practice of voice and agency. Voice and agency are important in excavating and recovering subjugated identities, and moving the concerns of those occupying subaltern spaces to the mainstream of teaching and learning. Yet this discursive shift is not without inherent challenges. Multi-modal technologies are reflective of wider inequities in the so-called technological divide. Whilst this is a book about higher education, there are important lessons for schooling. On the one hand, the book is a powerful demonstration of the potential of DST for enhancing learning in schools, particularly in schools serving the poor and marginalised. On the other hand, improving teaching and learning in higher education, through the creative use of technology, is essential to overcome the learning challenges of those entering tertiary level institutions.

*Life and Moral Education in Greater China* John Chi-Kin Lee 2021-03-30 Arguing for life, moral and values education as a bedrock for the original goals of school education, this monograph explores how life and values education is conceptualised and imparted in Greater China. Under a globalized, transnational, and technological world, where there has been an increase in people's mobility, in information and cultural exchanges, there is also a growing emphasis on personal and professional ethics. Against this context, life, moral and values education has gained attention for its impact on shaping students' characters as future citizens. However, the cultivation of these values is made deeply diversified and complex by varying interpretations of "life education" and "values education" across societies, given that different societies are influenced by different socio-cultural traditions, educational ideologies and religious beliefs. The means and approaches towards life education also vary vastly from formal school subjects, school-based programmes as well as teachers and peers' role modelling, community services, extra-curricular activities, school discipline, charity work, pastoral care, and school ethos. Recognising this inherent diversity and complexity in the approach to and the dissemination of life education, the contributors to this volume survey the practice of life education in Greater China so far, suggesting that life

education is most effective when it is "diversified, dynamic and developmental across contexts". This book will provide the opportunity for engaging in important and serious debates about the future and the values that will underpin it and will prove of special interest to scholars and practitioners working on education policies curriculum development and teacher education in Greater China.

**Creating Effective Teaching and Learning Spaces: Shaping Futures and Envisioning Unity in Diversity and Transformation** Zilungile Lungi Sosibo 2021-09-07 Higher education in post-apartheid South Africa was always likely to attract academic interest, and yet there remains a dearth of research on creating teaching and learning spaces suitable for students from diverse backgrounds. Using examples from higher education institutions across the Southern African Developing Community (SADC) region, this volume explores the ways teaching and learning spaces are being used to advance the transformation agenda of higher education in these regions, and provides concrete recommendations for the future. The book is sure to appeal to academics from a variety of disciplines - from African, African American and ethnic studies to education and sociology. It will be of particular interest to teacher trainers, administrators and policy-makers working in higher education, and anyone else with a stake in managing cultural diversity in education.

**Social Inequality** Charles E. Hurst 2016-08-05 Like past editions, this ninth edition of *Social Inequality: Forms, Causes, and Consequences* is a user-friendly introduction to the study of social inequality. This book conveys the pervasiveness and extensiveness of social inequality in the United States within a comparative context, to show how inequality occurs, how it affects all of us, and what is being done about it. This edition benefits from a variety of changes that have significantly strengthened the text. The authors pay increased attention to disability, transgender issues, intersectionality, experiences of Muslims, Hispanic populations, and immigration. The 9th edition also includes content on the fall-out from the recession across various groups. The sections on global inequalities have been greatly updated, emphasizing comparative inequalities and the impact of the process of globalization on inequality internationally. The authors have also added material on several current social movements, including Occupy Wall Street, Black Lives Matter, and Marriage Equality.

**The Climate Majority** Leo Barasi 2017-10-10 *The Climate Majority* is the first book to investigate climate apathy, to describe how it prevents action to stop climate change and to show how it can be beaten with an approach developed for political campaigns. Leo Barasi argues that dangerous climate change will only be prevented if the majority of people—including those who aren't environmentalists—are persuaded of the need to limit emissions. He applies his policy and campaign experience to show that politicizing climate change makes it more difficult to build consensus, particularly among people who are currently apathetic. This is one of few books to focus on public opinion and climate change and it attempts to reveal what people really think by drawing examples and evidence of from the United States, the UK, Australia, and Canada. In a time of growing nationalism in many developed countries—and right-wing negativity towards the need for meaningful action—*The Climate Majority* offers a new way of understanding what can be done within the system, rather than despite it. In an era of political setbacks for sustainability, we need new hope and new tools. Anyone who cares about climate change can draw on the lessons in this book to help build a climate majority. Leo Barasi is a freelance consultant on climate change policy and campaigns. He works with charities, political candidates, and private companies to help them understand and change public opinion. He writes regularly for the *New Statesman*, *openDemocracy*, and *Climate Home*.

**Der lange Weg zur Freiheit** Nelson Mandela 2014-01-25 »Ich bin einer von ungezählten Millionen, die durch Nelson Mandelas Leben inspiriert wurden.« Barack Obama Eine fast drei Jahrzehnte währende Gefängnishaft ließ Nelson Mandela zum Mythos der schwarzen Befreiungsbewegung werden. Kaum ein anderer Politiker unserer Zeit symbolisiert heute in solchem Maße die Friedenshoffnungen der Menschheit und den Gedanken der Aussöhnung aller Rassen wie der ehemalige südafrikanische Präsident und Friedensnobelpreisträger. Auch nach seinem Tod finden seine ungeborene Charakterstärke und Menschenfreundlichkeit die Bewunderung aller friedenswilligen Menschen auf der Welt. Mandelas Lebensgeschichte ist über die politische Bedeutung hinaus ein spannend zu lesendes, kenntnis- und faktenreiches Dokument menschlicher Entwicklung unter Bedingungen und Fähigkeiten, vor denen die meisten Menschen innerlich wie äußerlich kapituliert haben dürfen.

**Globalisation, Human Rights Education and Reforms** Joseph Zajda 2016-09-23 This book, the seventeenth instalment in the 24-volume series *Globalisation, Comparative Education and Policy Research*, explores the interrelationship between ideology, the state and human rights education reforms, setting it in a global context. The book examines major human rights education reforms and policy issues in a global culture. It focuses on the ambivalent and problematic relationship between the state, globalisation and human rights education discourses. Using a number of diverse paradigms, ranging from critical theory to historical-comparative research, the authors examine the reasons for, and the outcomes of human rights education reforms and policy. The authors discuss discourses surrounding the major dimensions affecting the human rights education, namely national identity, democracy, and ideology. These dimensions are among the most critical and significant dimensions defining and contextualising the processes surrounding the nation-building, identity politics and human rights education globally. With this as its focus, the chapters represent hand-picked scholarly research on major discourses in the field of human rights education reforms. The book draws upon recent studies in the areas of globalisation, equality, and the role of the state in human rights education reforms. Furthermore, the perception of

globalisation as dynamic and multi-faceted processes clearly necessitates a multiple-perspective approach in the study of human rights education. This book provides that perspective commendably. It also critiques current human rights education practices and policy reforms. It illustrates the way shifts in the relationship between the state and human rights education policy. In the book, the authors, who come from diverse backgrounds and regions, attempt insightfully to provide a worldview of current developments in research concerning human rights education, and citizenship education globally. The book contributes, in a very scholarly way, to a more holistic understanding of the nexus between nation-state, human rights education both locally and globally.

*The Queen of the South in Matthew 12:42*, authored by Soleilmavis Liu 2018-12-26 The Bible prophesies the Queen of the South will rise at the judgment, but did not give her name or any other detail about her. *The Queen of the South in Matthew 12:42*, authored by Soleilmavis Liu, is a strong and well-reasoned piece that demonstrates who the Queen of the South is, by using plenty of historical facts. It lets readers understand where the Ends of the Earth are, how the Queen of the South will come from the Ends of the Earth and what the judgment is. Ultimately, readers will come to know God's great plan regarding the Queen of the South. Soleilmavis hopes that her presentation sheds new light on this important person, who will play a decisive role in the history. This book is a step in that direction.
