But Does This Work With English Learners? Mary Amanda Stewart 2020-08-25  
Secondary ELA teachers, be excited: here at last is that crash course in utilizing the best of what we already know about teaching reading, writing, and language to ensure our English learners thrive. Take Penny Kittle and Donalyn Miller's reader's workshops. Take Kylee Beers and Robert Probst's "signposts." Take the best writing techniques advanced by the National Writing Project. Take Jim Burke's essential questions for life. Award-winning EL authorities Mandy Stewart and Holly Genova describe immediate adaptations you can put in place to simultaneously build your ELs' language and literacy, while affirming their languages, cultures, and unique lived experiences. A rare blend of the humane and practical, *But Does This Work with English Learners?* is a book on how to leverage our ELs' full linguistic repertoires in the ELA classroom, while remaining sensitive to those barriers that could restrict learning. With this book as your guide, you'll learn how to: Look beyond the labels, and better understand the diversity of ELs, English language proficiency levels, and sociopolitical influences  
Teach and assess through reader's workshop, recognizing where comprehensible input fits in and adapting recurring features like support, choice, conferencing, and academic conversations  
Teach and assess through writer's

workshops, including modifications to quick-writes, minilessons, conferencing, sharing, and more Teach through structures and community with classroom schedules and behavior norms, and activities like All About Me Paragraphs and Six Things You Need to Know About Me Listicles Embrace identity in inquiry cycles via research and family interviews, mentor texts and essays, pictorial autobiographies, memory paragraphs, and more Answer your own FAQs such as How do I teach students if I don't know their language? What about grammar? How do I teach the grade-level ELA standards while I teach the language? "As you read this book," Mandy and Holly write, "our hope is that you will begin to see your students as multilinguals—people who already have language as well as a wealth of knowledge and are just adding English to that great repertoire." If you have even a single English learner in your classroom, we urge you to read this book and institute its practices. Right away! "Mandy Stewart and Holly Genova have given us a primer for the evolving complexities of our classroom melting pots, a map for navigating the murky waters of regulations, and most importantly, a recipe for opening our arms to children from all over the world. They welcome them with thoughts like 'A foreign accent is a sign of bravery.'" --GRETCHEN BERNABEI, Coauthor of Fun-Sized Academic Writing for Serious Learning "After reading this book, I was left with the feeling that I learned something new on every page--something that I had previously either wondered about or struggled to understand. Mandy Stewart and Holly Genova are the guides we all need to help us understand and better address the needs of our English learners." --JIM BURKE, Author of The English Teacher's Companion

Gender Trouble Makers Jennifer Rothchild 2007-05-07 International development efforts aimed at improving girls' lives and education have been well-intended, somewhat effective, but ultimately short-sighted and incomplete. This is because international development efforts often operate under a reductive understanding of the term 'gender' and how it influences the lives of girls and boys. Gender is more commonly conceived by international efforts as characteristics which are ascribed to girls as norms for behaviour. In particular, the analysis in Gender Trouble Makers focuses on the social constructions of gender and the ways in which gender was reinforced and maintained through a case study in rural Nepal. In developing countries like Nepal, promoting access to and participation in existing formal education programme is clearly necessary, but it is not, in itself, sufficient to transform gender power relations in the broader society. When gender is properly addressed as a process, then all stakeholders involved - researchers, governmental officials, and community members - can begin to understand and devise more effective ways to increase both girl and boy students' enrollment, participation, and success in school.

A Guide to the Literature on Semirings and their Applications in Mathematics and Information Sciences K. Glazek 2013-06-29 This volume presents a short guide to the extensive literature concerning semirings along with a complete bibliography. The literature has been created over many years, in variety of languages, by authors representing different schools of mathematics and working in various related fields. In many instances the terminology used is not universal, which further compounds the difficulty of locating pertinent sources even in this age of the Internet and electronic dissemination of research results. So far there has been no single reference that could guide the interested scholar or student to the relevant publications. This book is an attempt to fill this gap. My interest in the theory of semirings began in the early sixties, when together with Bogdan W ~glorz I tried to investigate some algebraic aspects of compactifications of topological spaces, semirings of semicontinuous functions, and the general ideal theory for special semirings. (Unfortunately, local algebraists in Poland told me at that time that there was nothing interesting in investigating semiring theory because ring theory was still being developed). However, some time later we became aware of some similar investigations having already been done. The theory of semirings has remained "my first love" ever since, and I have been interested in the results in this field that have been appearing in literature (even though I have not been active in this area myself).

Towards A Democratic Nepal Mahendra Lawoti 2005-02-17 Providing a comprehensive critique of the Constitution adopted in 1990, this book identifies it as an important factor in the exclusion of various ethnic and minority groups. It examines the causes for the lack of democratic consolidation in Nepal and outlines alternative institutions that can give voice to the various socio-cultural groups in the country. Dr Lawoti makes a case for setting up a new Constituent Assembly and for following the principle of self-determination to reform the polity. He also makes several important recommendations for the construction of an inclusive and democratic Nepal.

New Horizons in Medical Anthropology Margaret Lock 2003-09-02 *New Horizons in Medical Anthropology* is a festschrift in honor of Charles Leslie whose

influential career helped shape this subfield of anthropology. This collection of cutting-edge essays explores medical innovation and medical pluralism at the turn of the 21st century. The book accomplishes two things: it reflects recent research by medical anthropologists working in Asia who have been inspired by Charles Leslie's writing on such topics as medical pluralism and the early emergence of what has become a globalized biomedicine, the social relations of therapy management, and the relationship between the politics of the state and discourse about the health of populations, illness, and medicine. The book also takes up lesser known aspects of Leslie's work: his contribution as an editor and the role he played in carrying the field forward; his ethics as a medical anthropologist committed to humanism and sensitive to racism and eugenics; and the passion he inspired in his co-workers and students. Charles Leslie is a remarkable and influential social scientist. *New Horizons in Medical Anthropology* is a fitting tribute to a sensitive scholar whose theories and codes of practice provide an essential guide to future generations of medical anthropologists.

*A Clinical Guide to the Treatment of the Human Stress Response* George S. Everly, Jr. 2019-03-05 This comprehensive update of the now classic text applies the most current findings across disciplines to the treatment of pathogenic human stress arousal. New and revised chapters bring together the art and science of intervention, based in up-to-date neuroscience, starting with an innovative model tracing the stress-to-disease continuum throughout the systems of the human body. The authors detail the spectrum of physiological and psychological treatments for the stress response, including cognitive therapy, neuromuscular relaxation, breathing exercises, nutritional interventions, and pharmacotherapy. They also assess the

strengths and limitations of widely-used measures of the stress response and consider the value of personality factors, cultural considerations, and resilience in stress mediation. Included in the coverage: The anatomy and physiology of the human stress response. Advances in neuroscience: implications for stress. Crisis intervention and psychological first aid. Neurophysiological rationale for the use of the relaxation response. Physical exercise and the human stress response. The pharmacological management of stress reactions. Disaster Mental Health Planning. Cultural Awareness and Stress. The Fourth Edition of A Clinical Guide to the Treatment of Human Stress Response offers readers a dual perspective, exceedingly useful in examining the origins of the stress response, and in preventing and treating the response itself. This rich integrative volume will join its predecessors in popularity among practitioners and students across disciplines and specialties.

Locating the Field Simon Coleman 2020-09-09 Are reports of the death of conventional fieldwork in anthropology greatly exaggerated? This book takes a critical look at the latest developments and key issues in fieldwork. The nature of 'locality' itself is problematic for both research subjects and fieldworkers, on the grounds that it must now be maintained and represented in relation to widening (and fragmenting) social frames and networks. Such developments have raised questions concerning the nature of ethnographic presence and scales of comparison. From the social space of a cybercafe to cities in India, the UK and South Africa among others, this book features a wide range of ethnographic studies that provide new ways of looking at the concepts of 'locality' and 'site'. It shows that rather than taking key fieldwork processes such as globalization and mobility for granted, anthropologists are well-placed to examine and critique the totalizing assumptions behind these notions.

International Handbook on Ecotourism Roy Ballantyne 2013-01-01 Roy and Jan have assembled a timely snapshot of our current understanding of ecotourism, both as a concept worthy of scientific inquiry and as an increasingly significant segment of global commerce and industry. A terrific piece of work! Sam Ham, University of Idaho, US In the 30 or so year since it became established in the tourism literature and in tourism practice, ecotourism has attracted as many proponents as opponents. This Handbook now brings together some of the leading scholars worldwide in this field, to explore the current position of this form of tourism. In doing so, it offers serious critiques, it explores meanings and paradoxes, it offers best practices and it looks to the future. It is the Handbook for one of tourism's fastest growing and controversial sectors. David Airey, University of Surrey, UK This is a most welcome and needed book. With a very strong editorial team and contributing authors, the Handbook covers all the key issues of ecotourism. It cuts through the confusion surrounding the much-misunderstood concept of ecotourism, clearly dealing with definitions, concepts and research issues. The Handbook is particularly welcome for its focus on the visitor experience, a strength of the editors, and for clearly linking the theory of ecotourism with practice in the field. Christopher Cooper, Oxford

Brookes University, UK This Handbook brings together contributions from over forty international experts in the field of ecotourism. It provides a critical review and discussion of current issues and concepts it challenges readers to consider the boundaries of what ecotourism is, and could be. The Handbook provides practical information regarding the business of ecotourism; insights into ecotourist behaviour and visitor experiences; and reflections on the practice of ecotourism in a range of different contexts. The Handbook is designed to be a valuable reference book for tourism scholars and researchers.

Resistance and the State David Gellner 2007-04-15 There has been growing concern about "failed states" around the world, and since the massacre of the Royal family in Nepal in 2001 increasing media attention has focused on the decline of the state and the rise of the Maoist rebels in this Himalayan kingdom where so many Westerners have taken trekking vacations. Development was always going to be a problem in Nepal, but few predicted the precipitous collapse of the state in rural areas in the face of the Maoist insurgency beginning in 1996 due, to a large extent, to the failure of the state to deliver promised development and benefits; instead, it became more and more authoritarian, even oppressive. Exploring the complex relationship between a modernizing, developmentalist state and the people it professes to represent, these fascinating and readable accounts of ordinary people's lives depict the various contexts out of which the Maoist insurgency grew.

Walford's Guide to Reference Material: Generalia, language and literature, the arts Albert John Walford 1996 From its first edition the purpose of Walford has been to identify and evaluate the widest possible range of reference materials. No rigid definition of reference is applied. In addition to the expected bibliographies, indexes, dictionaries, encyclopaedias, and directories, a number of important textbooks and manuals of general practice are included. While the majority of the items are books, Walford is a guide to reference material. Thus periodical articles, microforms, online and CD-ROM sources are all represented. In this volume a particular effort has been made to improve coverage of the latter two categories.
