*Resolution of Singularities Herwig Hauser 2000-02-14 In September 1997, the Working Week on Resolution of Singularities was held at Oberurgl in the Tyrolean Alps. Its objective was to manifest the state of the art in the field and to formulate major questions for future research. The four courses given during this week were written up by the speakers and make up part I of this volume. They are complemented in part II by fifteen selected contributions on specific topics and resolution theories. The volume is intended to provide a broad and accessible introduction to resolution of singularities leading the reader directly to concrete research problems.*

*Knitting Ganseys Beth Brown-Reinsel 2018-07-31 Originally released in 1993, Beth Brown-Reinsel's bestseller, Knitting Ganseys, is a classic in the hearts of traditional and modern knitters alike, bringing this historic tradition to your needles for 25 years! This completely revised and update version of the perennial bestseller includes 100% new photography, new patterns, and more! This special edition celebrates with new patterns for sweaters in the traditional gansey style as well as new explorations of modern gansey-inspired patterns. Full-color, step-by-step photography walks you through a variety of traditional gansey techniques and construction methods, plus contemporary sources for traditional gansey yarns are shared, making this as vital to your knitting library as the original.*

*Reliable Post Disaster Services over Smartphone Based DTN Souvik Basu 2019-03-28 This book proposes a framework and strategies for reliable end-to-end post-disaster services using smartphone-based delay-tolerant networks, which can operate even in the absence of conventional network connectivity. It explores various aspects of this challenge, ranging from accurate need assessment, to timely need accumulation, efficient resource allocation, and reliable data dissemination. The book offers insightful reading for all technologists and researchers working in the domain of ICT-based disaster management in developing countries, and will help them grasp the challenges involved in providing post-disaster services in an extremely difficult network scenario, while also offering possible solutions. The book will also benefit disaster management authorities, government agencies, NGOs and other stakeholders, helping them enhance their preparedness through the intelligent use of wireless technologies coupled with smart devices.*

*Event-Based Control and Signal Processing Marek Miskowicz 2018-09-03 Event-based systems are a class of reactive systems deployed in a wide spectrum of engineering disciplines including control, communication, signal processing, and electronic instrumentation. Activities in event-based systems are triggered in response to events usually representing a significant change of the state of controlled or monitored physical variables. Event-based systems adopt a model of calls for resources only if it is necessary, and therefore, they are characterized by efficient utilization of communication bandwidth, computation capability, and energy budget. Currently, the economical use of constrained technical resources is a critical issue in various application domains because many systems become increasingly networked, wireless, and spatially distributed. Event-Based Control and Signal Processing examines the event-based paradigm in control, communication, and signal processing, with a focus on implementation in networked sensor and control systems. Featuring 23 chapters contributed by more than 60 leading researchers from around the world, this book covers: Methods of analysis and design of event-based control and signal processing Event-driven control and optimization of hybrid systems Decentralized event-triggered control Periodic event-triggered control Model-based event-triggered control and event-triggered generalized predictive control Event-based intermittent control in man and machine Event-based PID controllers Event-based state estimation Self-triggered and team-triggered control Event-triggered and time-triggered real-time architectures for embedded systems Event-based continuous-time signal acquisition and DSP Statistical event-based signal processing in distributed detection and estimation Asynchronous spike event coding technique with address event representation Event-based processing of non-stationary signals Event-based digital (FIR and IIR) filters Event-based local bandwidth estimation and signal reconstruction Event-Based Control and Signal Processing is the first extensive study on both event-based control and event-based signal processing, presenting scientific contributions at the cutting edge of modern science and engineering.*

*Essentials of Diagnostic Breast Pathology Farid Moinfar 2007-02-08 Focuses on the essential information needed by pathologists in order to be able to interpret breast lesions (tumors) appropriately. This book talks about the diagnostic criteria with systematic analysis of differential diagnoses. It also demonstrates value and limitations of immunohistochemistry as a diagnostic adjunct.*

*Norah Gaughan's Twisted Stitch Sourcebook Norah Gaughan 2021-01-12 The essential guide to using simple twisted stitches to add interest and beauty to handknits Master the simple and addictive art of the twisted stitch. The basics are easy to learn, and the design possibilities (and twist combinations that come to light once you begin) are almost endless. The book starts with a treasure trove of twisted stitch variations, starting with patterns made from diagonals and building from there—adding horizontal and vertical elements, combining twisted stitches with lace or polygon knitting, and pushing boundaries with patterns that twist stitches in every row for more advanced textures. The book offers 125-plus stitch patterns, along with guidance on how the twists are engineered and how knitters can create designs of their own. Norah's always-clear instructions are presented in a conversational, easy-to-understand voice that proceeds naturally as one twisted stitch leads to the next. Readers can test their newfound skills with the 15 garment patterns included—irresistible designs for hats, wraps, sweaters, and more.*

*Fundamentals of Classical and Modern Error-Correcting Codes Shu Lin 2021-11-30 Using easy-to-follow mathematics, this textbook provides comprehensive coverage of block codes and techniques for reliable communications and data storage. It covers major code designs and constructions from geometric, algebraic, and graph-theoretic points of view, decoding algorithms, error control additive white Gaussian noise (AWGN) and erasure, and dataless recovery. It simplifies a highly mathematical subject to a level that can be understood and applied with a minimum background in mathematics, provides step-by-step explanation of all covered topics, both fundamental and advanced, and includes plenty of practical illustrative examples to assist understanding. Numerous homework problems are included to strengthen student comprehension of new and abstract concepts, and a solutions manual is available online for instructors. Modern developments, including polar codes, are also covered. An essential textbook for senior undergraduates and graduates taking introductory coding courses, students*

taking advanced full-year graduate coding courses, and professionals working on coding for communications and data storage.

**The Knitted Rug Donna Druchunas 2004** Here's a fresh take on the crafts of rugmaking and knitting—the very first book of its kind. These 21 stylish rug projects are so eye-catching that it's hard to believe that even novice knitters can create them. But they can, thanks to a thorough section on knitting basics, sumptuously illustrated with more than 60 how-to photographs; advice on embellishments, including embroidery, fringes, and tassels; and instruction on finishing touches, such as weaving ends, sewing seams, blocking, backing, and lining. Put this knowledge to work on a multicolored Big Needle Garter Stitch Rug, Knit and Purl Oval Rug, Thunderbird Wall Tapestry, and others. Every rug is beautifully photographed in a home setting, and includes patterns and ideas for modifying the design. The author lives in Longmont, CO.

**Image Analysis and Processing - ICIAP 2017 Sebastiano Battiato 2017-10-13** The two-volume set LNCS 10484 and 10485 constitutes the refereed proceedings of the 19th International Conference on Image Analysis and Processing, ICIAP 2017, held in Catania, Italy, in September 2017. The 138 papers presented were carefully reviewed and selected from 229 submissions. The papers cover both classic and the most recent trends in image processing, computer vision, and pattern recognition, addressing both theoretical and applicative aspects. They are organized in the following topical sections: video analysis and understanding; pattern recognition and machine learning; multiview geometry and 3D computer vision; image analysis, detection and recognition; multimedia; biomedical and assistive technology; information forensics and security; imaging for cultural heritage and archaeology; and imaging solutions for improving the quality of life.

**Fundamentals of Computer Security Josef Pieprzyk 2003-01-21** This reference work looks at modern concepts of computer security. It introduces the basic mathematical background necessary to follow computer security concepts before moving on to modern developments in cryptography. The concepts are presented clearly and illustrated by numerous examples. Subjects covered include: private-key and public-key encryption, hashing, digital signatures, authentication, secret sharing, group-oriented cryptography, and many others. The section on intrusion detection and access control provide examples of security systems implemented as a part of operating system. Database and network security is also discussed. The final chapters introduce modern e-business systems based on digital cash.

**Dynamics in Logistics Michael Freitag 2016-09-15** These proceedings contain research papers presented at the 5th International Conference on Dynamics in Logistics, held in Bremen, Germany, February 2016. The conference is concerned with dynamic aspects of logistic processes and networks. The spectrum of topics reaches from modeling, planning and control of processes over supply chain management and maritime logistics to innovative technologies and robotic applications for cyber-physical production and logistic systems. The growing dynamic confronts the area of logistics with completely new challenges: it must become possible to describe, identify and analyze the process changes. Moreover, logistic processes and networks must be redesigned to be rapidly and flexibly adaptable to continuously changing conditions. The book primarily addresses researchers and practitioners from the field of industrial engineering and logistics, but it may also be beneficial for graduate students.

**Prehistoric, Ancient Near Eastern & Aegean Textiles and Dress Marie-Louise Nosch 2014-09-30** Textile and dress production, from raw materials to finished items, has had a significant impact on society from its earliest history. The essays in this volume offer a fresh insight into the emerging interdisciplinary research field of textile and dress studies by discussing archaeological, iconographical and textual evidence within a broad geographical and chronological spectrum. The thirteen chapters explore issues, such as the analysis of textile tools, especially spindle whorls, and textile imprints for reconstructing textile production in contexts as different as Neolithic Transylvania, the Early Bronze Age North Aegean and the Early Iron Age Eastern Mediterranean; the importance of cuneiform clay tablets as a documentary source for both drawing a detailed picture of the administration of a textile industry and for addressing gender issues, such as the construction of masculinity in the Sumerian kingdoms of the 3rd millennium BC; and discussions of royal and priestly costumes and clothing ornaments in the Mesopotamian kingdom of Mari and in Mycenaean culture. Textile terms testify to intensive exchanges between Semitic and Indo-European languages, especially within the terminology of trade goods. The production and consumption of textiles and garments are demonstrated in 2nd millennium Hittite Anatolia; from 1st millennium BC Assyria, a cross-disciplinary approach combines texts, realia and iconography to produce a systematic study of golden dress decorations; and finally, the important discussion of fibres, flax and wool, in written and archaeological sources is evidence for delineating the economy of linen and the strong symbolic value of fibre types in 1st millennium Babylonia and the Southern Levant. The volume is part of a pair together with Greek and Roman Textiles and Dress: An Interdisciplinary Anthology edited by Mary Harlow and Marie-Louise Nosch.

This conference, held August 14 - 18, featured over 100 lectures from more than 300 contributors, and included three panel sessions and three keynote addresses. The international authorship includes experts from around the globe, from Texas to Tokyo, from Leiden to London. Compiled by faculty at the University of Illinois and sponsored by Penn State University, these Proceedings are a comprehensive look at all that's new in the field of parallel processing.

**Land Surface Evaporation Thomas J. Schmugge 2012-12-06** General circulation model (GCM) experiments in the late 1970's indicated that the climate is sensitive to variations in evaporation at the land surface. Thus, in the context of climate modeling, it became important to develop techniques which would realistically estimate the evaporation flux on land. Land Surface Evaporation: Measurement and Parameterization discusses strategies for the use of experimental data in developing and testing parameterization schemes of the evaporation flux in GCM's. The book reviews state-of-the-art techniques, such as remote sensing, which measure evaporation fluxes over continental surfaces. It evaluates their relevance with respect to the various spatial and temporal scales of interest. This book will provide researchers in climatology, meteorology, hydrology and water management, and remote sensing with a thorough overview of current research in land surface evaporation. It will also give young scientists insight into surface processes.

**Understanding Green Revolutions Bertram Hughes Farmer 1984-05-03** This book is a critical examination of the truth behind the stereotype

that there is a Green Revolution in agricultural technology. Twenty-one specialists in the field of development studies look at the reality of agrarian change, either through historical analysis, or through in-depth village field-work, or from their experience as development planners. *Slow Knitting* Hannah Thiessen 2017-10-10 "Thiessen has done her research, and talked to people who truly have insight into the process of making both yarn and clothing." —Modern Daily Knitting Like the "slow food" movement, *Slow Knitting* encourages knitters to step back, pare down, and celebrate the craftsmanship of their work. In five chapters centered around the tenets of slow knitting—sourcing carefully, making thoughtfully, thinking environmentally, experimenting fearlessly, and exploring openly—Hannah Thiessen challenges knitters of all skill levels to view their practice in a new way. Each chapter contains explorations of fiber types; profiles of well-known yarn types, makers, and yarn suppliers; and garment patterns inspired by the featured fibers. With contributions from knitting superstars Norah Gaughan, Bristol Ivy, and many others, *Slow Knitting* proposes an approach to knitting that is both minimalist and all-encompassing, and emphasizes what makes knitting a meditation, a passion, and a unique necessity. "Promotes the concept of 'slow knitting' which discards the pressure to produce prolifically and instead, revolves around the idea that thoughtfully produced yarn will result in better projects for you-the crafter." —MarthaStewart.com

*CNPS Proceedings 2017* David de Hilster 2017-07-07 The John Chappell Natural Philosophy Society (CNPS) provides an open forum for the study, debate, and presentation of serious scientific ideas, theories, philosophies, and experiments that are not commonly accepted in mainstream science. The CNPS uses the term "Natural Philosophy" in its broader sense which includes physics, cosmology, mathematics, and the philosophy of science. Our goal is to return to the basics where things went wrong and start anew.

*Post-disaster Navigation and Allied Services over Opportunistic Networks* Suman Bhattacharjee 2021-04-15 This book provides the details of developing a digital pedestrian map construction system over the intermittently connected mobile network. Over the past couple of decades, countries across the world, both developing and developed, have witnessed a significant number of disasters. Thus, it has become mandatory for each of the disaster-prone countries to equip themselves with appropriate measures to cope with the challenges of providing post-disaster services. Some of the serious challenges are incapacitated communication infrastructure, unstable power supply and inaccessible road networks. Out of these challenges, the destruction of road networks, especially in developing countries, acts as a major hindrance to effective disaster management. To be more specific, the success of a disaster response operation generally depends on the speed of evacuation and transportation of adequate amount of relief materials at the right time to the disaster-affected areas. Hence, map-based navigation support is a primary requirement for post-disaster relief operations. This book also provides the solution of the two other important post-disaster management services such as situational awareness and resource allocation. Both of these services are invariably dependent on the existence of navigation support. Finally, in order to offer such services, the other challenge is to address the problem of incapacitated communication infrastructure. This book also deals with such challenges in post-disaster scenarios and develops automated post-disaster management services.

*Foundations of Quantum Theory* E.M. Rasel 2019-01-23 This volume provides a summary of the lectures presented at the International School of Physics "Enrico Fermi" on the Foundations of Quantum Theory, organized by the Italian Physical Society in Varenna, Italy from 8-13 July 2016, in collaboration with the Wilhelm und Else Heraeus-Stiftung. It was the first "Enrico Fermi" Summer School on this topic since 1977. Its main goal was to provide an overview of the recent theoretical and experimental developments in an active field of research, the foundations of quantum mechanics. The field is characterized by a dichotomy of unparalleled agreement between theory and experiment on the one hand, and an enormous variety of interpretations of the underlying mathematical formalism on the other hand. This proceedings of the "Enrico Fermi" Summer School of July 2016 contains 21 contributions on a range of topics: the history and interpretations of quantum theory; the principle of complementarity and wave-particle duality; quantum theory from first principles; the reality of the wave function; the concept of the photon; measurement in quantum theory; the interface of quantum theory and general relativity; and quantum optical tests of quantum theory.

*Logic Colloquium '80* D. van Dalen 2009-06-05 The papers appearing in this volume are part of those originally intended for presentation at the conference: Logic Colloquium '80 - European Summer Meeting of the Association for Symbolic Logic (A.S.L.) which was to take place in Prague, August 24-30, 1980, principally under the auspices of the Czech Academy of Sciences. There were 36 invited speakers from Western and Eastern Europe, Israel, the U.S., and the U.S.S.R. The local organizing committee cabled participants on July 15, 1980 to inform them that the meeting was cancelled for technical reasons; a subsequent communication stated that the cancellation was due to unforeseen circumstances lying beyond the control of the organizing committee. The unexpected cancellation of the Prague meeting was greatly regretted, since so much care, time, and energy had been given to its advance preparation by the local organizing committee as well as by representatives of the A.S.L. and its European Committee. The late date on which cancellation took place required drastic changes of plans by speakers and participants. Last-minute efforts to reschedule the meeting elsewhere in Europe could not be realized.
