Der letzte Führerscheinneuling Mario Herger 2017-10-12 Feierabend. Bei Uber einen selbstfahrenden Tesla bestellt, der mich fünf Minuten später am Büro abholt und nach Hause bringt. Danach verschwindet das Elektroauto lautlos in der Nacht. Klingt nach Zukunft. Ist es auch. Aber sehr nahe Zukunft. Was bedeutet die Kombination aus autonomem Fahren, Elektromobilität und Sharing Economy für Taxifahrer, Lkw-Fahrer, Arbeiter bei VW und BMW oder Betreiber von Parkhäusern? Wie sehen die Städte der Zukunft aus und welche Herausforderungen bringen sie mit sich? Silicon-Valley-Insider Dr. Mario Herger über eine der größten Umwälzungen seit der Dampfmaschine.

Seaforth World Naval Review 2016 Conrad Waters 2015-11-03 "The crème de la crème of naval writers . . . an extremely detailed overview of the last year in naval policy, construction and deployment."—Warship World This annual has an established reputation as an authoritative but affordable summary of all that has happened in the naval world in the previous twelve months. It combines regional surveys with one-off major articles on noteworthy new ships and other important developments. Besides the latest warship projects, it also looks at wider issues of importance to navies, such as aviation and electronics, and calls on expertise from around the globe to give a balanced picture of what is going on and to interpret its significance. This edition looks in detail at the Royal Navy as it faces the latest defense review, and evaluates the Indonesian Navy, while significant ships will include the USN's San Antonio class amphibious transports, the new Dutch OPVs, the Turkish Milgem class corvettes and the Greek Roussen class fast attack craft. There are also technological reviews dealing with naval aviation by David Hobbs, focusing on maritime patrol aircraft, while Norman Friedman surveys recent electronic warfare developments. Intended to make interesting reading as well as providing authoritative reference, there is a strong visual emphasis, including specially commissioned drawings and the most up-to-date photographs and artists' impressions. For anyone with an interest in contemporary naval affairs, whether an enthusiast or a defense professional, this annual has become required reading. "A high-quality, deeply-researched and handsomely-illustrated book."—Army Rumour Service

Popular Mechanics 1987-08 Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

When Technology Fails Matthew Stein 2008-08-18 There's never been a better time to "be prepared." Matthew Stein's comprehensive primer on sustainable living skills—from food and water to shelter and energy to first-aid and crisis-management skills—prepares you to embark on the path toward sustainability. But unlike any other book, Stein not only shows you how to live "green" in seemingly stable times, but to live in the face of potential disasters, lasting days or years, coming in the form of social upheaval, economic meltdown, or environmental catastrophe. When Technology Fails covers the gamut. You'll learn how to start a fire and keep warm if you've been left temporarily homeless, as well as the basics of installing a renewable energy system for your home or business. You'll learn how to find and sterilize water in the face of utility failure, as well as practical information for dealing with water-quality issues even when the public tap water is still flowing. You'll learn alternative techniques for healing equally suited to an era of profit-driven malpractice as to situations of social calamity. Each chapter (a survey of the risks to the status quo; supplies and preparation for short- and long-term emergencies; emergency measures for survival; water; food; shelter; clothing; first aid, low-tech medicine, and healing; energy, heat, and power; metalworking; utensils and storage; low-tech chemistry; and engineering, machines, and materials) offers the same approach, describing skills for self-reliance in good times and bad. Fully revised and expanded—the first edition was written pre-9/11 and pre-Katrina, when few Americans took the risk of social disruption seriously—When Technology Fails ends on a positive, proactive note with a new chapter on "Making the Shift to Sustainability," which offers practical suggestions for changing our world on personal, community and global levels.

Fettnäpfchenführer Dänemark Katja Josteit 2021-04-07 Dänemark - das ist ja nur mal eben über die Grenze. Da wird es keine großen Unterschiede geben, denkt Jan auf dem Weg ins Land von røde pølser und der kleinen Meerjungfrau. Vor einem längeren Geschäftsaufenthalt will er mit seiner Freundin Katie Urlaub machen, bei der gemeinsamen Reise das kleine Königreich im Norden kennenlernen und das Liebesleben mit ein wenig Hygge wieder zum Knistern bringen. Doch was bedeutet das eigentlich? Schnell muss Jan feststellen, dass er von den Feinheiten der dänischen Etikette nicht sehr viel weiß. Gesiezt wird allenfalls die Königin, Falschparken kann unerwartet teuer werden, tak, also danke, kann man auf mehrere Arten sagen, und manchmal bedeutet es sogar "bitte". Während ihres Aufenthalts tappen Jan und Katie regelmäßig in den Spinat, wie es im Dänischen heißt, um am Ende herauszufinden: Wahre Hygge existiert unabhängig von Zerkenschein und Kaminfeuer - und zwar im Herzen. Der ultimative Reiseknigge für unseren Nachbarn im Norden
